

KILLERSPORTS.COM

2014 NFL ANNUAL

400+ Perfect NFL Trends
In-depth Gambling Studies
Key Systems and Notes
and Much, Much More

WANT 2014 TO BE YOUR BEST FOOTBALL BETTING SEASON YET?

At Killersports, we have the must-have handicapping information you need every week to make that dream a reality. Subscribe now to the 2014 Killersports.com NFL Report. Each week, Killersports.com, MTi Sports and SportsBook Breakers will provide 12 pages of hard hitting information for that week's NFL and college football action. Included in the action-packed content you can expect each and every week for 17 weeks:

- **Four (4) Full NFL Selections from MTi and SportsBook Breakers**
- **MTi's NFL Teaser Plays with Exclusive Teaser Trends**
- **NFL and NCAA Trend and System Breakdowns**
- **NFL and NCAA Trends of the Week with the SDQL text**
- **Dozens of NFL Trends for both Sides and Totals**
- **NFL Player Based Trends**
- **Weekly Annotated NFL Schedule Chart**
- **Delivered by e-mail every Wednesday.**

To view sample reports from past seasons,
visit the Downloads page at Killersports.com

All 17 issues of the 2014 NFL Report are available now with a yearly subscription for just \$169 in web debit value. That's less than \$10 per issue for the best NFL handicapping information in the business — a savings of over \$250 off the cover price. **BONUS:** Subscribe before the season and get a special 12-pg NFL Bible Bonus section loaded with trends included **FREE** with you subscription.

The 2014 NFL Bible

The 2014 NFL Handicapping Bible contains information that you can use to become a confident, informed and successful football bettor.

There are several different trend sets, including unbelievable teaser trends provided by MTi Sports and fantastic new NFL player-based trends sets from SportsBook Breakers. Also included are some college trends and systems from SportsBook Breakers.

The main trend set includes 12 trends in past performance for each team. There are five play-on trends, five play-against trends, one play-under trend and one play-over trend.

There is also some great schedule analysis and futures beating information provided by MTi Sports.

ALL of the trends come with the Sports Data Query Language (SDQL) that generates the trend. With the SDQL text, you can not only verify the accuracy of the trend now, you can see how the trend is performing anytime during the season and to see if it is active for an upcoming game. To check any trend, type (or paste) the SDQL text into the query text box at:

killersports.com/nfl.py/query

and then simply click on the query button. The results should appear in a second or two.

If you have any questions about the SDQL, post them at the Google Group for the SDQL at:

<http://groups.google.com/group/SportsDataBase>

The group has many expert members, including MTi Sports Forecasting and the genius behind the Sports Data Query Language, Dr. Joe Meyer. Feel free to post any questions/comments about this publication there as well. You can also visit the brand new sdqlconsultancy.com where you can interact with SDQL experts and watch FREE How-To and Query of the Day Videos.

For the self-starters, there is a quick overview of the SDQL text on page 6.

To keep up on the latest trends and currently evolving systems DURING the season, consider subscribing to the *KillerSports.com 2014 NFL Weekly Report*.

The Weekly Report will be LOADED with information on the upcoming games for THAT WEEK. Subscription information is now available at Killersports.com.

Friday Football Tipsheet Available FREE!!!

Sign up at www.killersports.com

SportsBook Breakers and Killersports.com are teaming up again to produce the 2014 Friday Football Tipsheet. This one-page sheet is a great resource for gambling information on each weekend's games. The sheet will contain several NFL and NCAA trends active each weekend which you will want to consider before making your picks.

You can get all this for the low, low price of FREE! That is not a misprint as SportsBook Breakers and Killersports.com have collaborated to provide this invaluable information for you free of charge.

When you sign up at Killersports.com (or go to Edit Profile and Subscriptions for those already members) all you have to do is click the "E-mail me the free KillerSports.com Newsletters" to get this sheet delivered free to your inbox every Friday.

SDQL Consultancy Group

The SDQL Consultancy Group provides the opportunity to learn about the SDQL by watching videos and discussing the SDQL with certified masters.

There are two general types of videos on this site, general how-to videos and videos with specific trends and system that apply to upcoming games.

**This unbelievably valuable resource is available ABSOLUTELY FREE!
That's right, FREE!**

Join today at sdqlconsultancy.com and start exploring the power of the SDQL!

QUICK SDQL OVERVIEW

SDQL stands for Sports Data Query Language. It is a language that allows the investigation of past sports results over the internet using your home computing device. It is easy, it is fast and it is FREE. If you can perform a search on Google, you can query the past results of professional sports games.

Like the Google search, there is a text query box in which you enter what you would like to search. Unlike Google, the search has to be specific and you must use the Sports Data Query Language. The advantage of the SDQL is that you get one hit, which is exactly what you asked for—not a billion hits, most of which are not what you are looking for.

For example, if you want to see all the shutouts in the NFL since 1989 (the start of the database), simply enter:

into the query text box and then click on the query button. It is as simple as that! There are SDQL query text boxes at many internet sites. The most developed is currently at:

killersports.com/nfl.py/query

To see all the NFL games in which a team committed at least five turnovers and won the game, enter

That's it!

The SDQL allows access to billions of situations that are of interest to sports historians, the sports media, fantasy league participants and serious sports bettors.

The ability to quickly and efficiently interrogate historical data in the NFL (as well as the NBA and MLB) will provide the SDQL user a terrific advantage over those that just pore over box scores and read other people's interpretations of the results.

Perhaps the best way to grasp the SDQL is to simply try the hundreds of examples in this book using query page.

Basically, there are only a couple of key ideas that will get you well on your way to becoming an SDQL master.

The first is that a query consists of a number of conditions separated by the word "and." The second is grasping the difference between the team and the opponent. In sports, there are two combatants. To distinguish between them, SDQL calls one of these the **team** and the other the **opponent**. This allows access to results based on both the

performance of the team and the performance of their opponent. For example, we can see how a team performs when they score at least 24 points and we can see how a team performs when their opponent scores at least 24 points.

For example, to see how the Patriots perform in games in which they scored at least 24 points, use:

When this query is run, the computer responds with a records summary and a game listing of all the games since 1989 in which the Patriots scored at least 24 points.

To see how the Patriots perform in games in which they allowed at least 24 points, use:

The o: game reference on the "points" directs the "points" parameter to the opponent.

To see how the Patriots perform in games AFTER they scored at least 24 points, use:

Here, the p: game reference on the "points" directs the parameter to the team's previous game.

Each one of these queries has two SDQL phrases. The first defines the team and the second gives a condition. There is no limit to the number of SDQL phrases that can be strung together with the word "and."

That's it. This is the basic structure of the SDQL. This structure will allow the thorough interrogation and investigation of historical sports data. Understanding this structure is the key to understanding the SDQL. Once you have a grasp of this structure, you will be able to perform your own investigations.

Start by trying the many examples in this book. If you have any questions about the SDQL, address them to the sportsdatabase.com discussion group at:

<http://groups.google.com/group/SportsDataBase>

This group is monitored by numerous SDQL masters who will be able to address all your well-posed questions.

Happy Hunting!

Breakers NFL

Player-Based Trends

For years, the powerful SDQL has allowed the search of tens of thousands of situations leaguewide or focused on individual teams. However, there is benefit to digging into the situation even further and showing how players have performed on an individual level and how that affects their team's performance in that game, or going forward. The geniuses behind the SDQL have responded and there is now the ability to run queries at an individual player level.

Below are the following parameters available for player level queries:

Passing Parameters: completions, interceptions thrown, name, passes, passing conversions, passing touchdowns, passing yards

Rushing Parameters: longest rush, name, rushes, rushing conversions, rushing touchdowns, rushing yards

Receiving Parameters: longest reception, name, receiving conversions, receiving touchdowns, receiving yards, receptions

Fumbles Parameters: fumble yards, fumbles, fumbles lost, fumbles recovered, name

Defense Parameters: forced fumbles, fumble return touchdowns, interception return touchdowns, interceptions, name, sacks, safeties, tackle assists, tackles

Kicking Parameters: field goals, field goals attempted, kicking extra points, kicking extra points attempted, longest field goal, name

Punting Parameters: average punt yards, longest punt, name, punts, punts inside the twenty

Punt Returns Parameters: average punt return, longest punt return, name, punt return

touchdowns, punt returns

Kickoff Returns Parameters: average kickoff return, kickoff return touchdowns, kickoff returns, longest kickoff return, name

Here is a sample SDQL of one of the player based trends:

TBrady:p:passing yards<=133

This trend searches all games which Tom Brady threw for no more than 133 yards in his last game. All players are recorded by their first initial and last name, or by their full name.

One great feature of these player-based trends is that you can easily run queries spanning through a player's career on more than one team. However if you want to specify a players performance with only one team, the easiest way is to isolate that with a trend such as:

Seahawks:MLynch:p:rushing yards>=100

That query isolates games where Marshawn Lynch ran for at least 100 yards last game, only during his time with Seattle.

There are several more subtleties to running player based trends, some of which you'll see in the pages below, where there are 10 quarterback trends, 10 running back trends and 10 receiver trends, as well as a featured player trend.

Don't be afraid to try running your own player- based trends at www.killersports.com. If you run into any issues — or have a great handicapping find — post your finding on the [SportDatabase Google Group](#) or save your trends to your Killersports.com account.

FEATURED PLAYER TRENDS

SportsBook Breakers – Top QB/WR Combination Trend

Jay Cutler and Brandon Marshall are 0-21-2 ATS (-9.0 ppg) in their careers after a game where Cutler had at least 20 completions and 1 or 2 TD passes, if at least three of the completions went to Marshall.

SDQL Text

JayCutler:p:completions>=20 and
BrandonMarshall:p:receptions>=3
and 2>=JayCutler:p:passing
touchdowns>=1

System Analysis

One of the exciting things about the ability to run player trends using SDQL is being able to do so in combination. The time where this will generally make the most sense is when looking at a quarterback and one of his favorite pass catching targets. For instance, it is easy to isolate games where both Tom Brady and Rob Gronkowski had big games.

When you think of a QB and his favorite target, a combination that should immediately come to mind is Jay Cutler and Brandon Marshall. When the situation warrants heavy passing, Cutler is known for force feeding the ball to his go-to receiver in Marshall.

Cutler and Marshall have played together in two stops, and both are reflected with this trend. What this trend isolates is a game where Cutler had a large number of completions and an average number of TD throws, if Marshall was at least modestly involved in receiving his targets.

For Cutler, zoning in on Marshall can be a bad going forward. Watch for this trend to be active several times in 2014, after seven such occasions in 2013.

PLAYER-BASED TRENDS: QBS

There is no player that controls a game more than the quarterback. They are the only player on the field with the ball in their hands in half of the plays every game. As such, it makes sense that quarterbacks have the best of the player-based trends, and that their performance in one game or against a certain team would have a great bearing on future games. Below are 10 quarterback trends from some of the elite signal callers in the NFL.

| DESCRIPTION | SDQL TEXT |
|---|--|
| Tom Brady is 11-0 ATS (10.7 ppg) since 2004 after a game where he completed less than 50% of his passes. | <i>TBrady:p:completions/TBrady:p:passes<=.5 and season>=2004</i> |
| Drew Brees is 11-0-1 ATS (10.4 ppg) in his career in Sunday games, following a game where he threw less than 30 passes and had at least one interception. | <i>DBrees:p:passes<30 and DBrees:p:interceptions>=1 and day=Sunday</i> |
| Jay Cutler is 0-9-2 ATS (-3.7 ppg) since 2011 after a game where he threw at least 33 passes and had less than 28 completions. | <i>JCutler:p:passes>=33 and JCutler:p:completions<28 and season>=2011</i> |
| Robert Griffin III is 6-0 ATS (9.2 ppg) in his career after a game where he had 10-15 completions. | <i>15>=RobertGriffin:p:completions>=10</i> |
| Andrew Luck is 15-0-1 ATS (8.6 ppg) in his career after a Sunday game where he threw between 35 and 50 passes and completed over 45% of them. | <i>50 >= Andrew Luck:p:passes >= 35 and Andrew Luck:p:completions / Andrew Luck:p:passes > .45 and p:day = Sunday</i> |
| Philip Rivers is 13-0 ATS (15.4 ppg) since October 25, 2009 after a game where he threw 33-39 passes and they had between 210 and 380 team passing yards. | <i>39>=PRivers:p:passes>=33 and 380>=p:passing yards>=210 and date>=20091025</i> |
| Aaron Rodgers is 6-0 ATS (13.3 ppg) since November 2008 with at least full rest following a game where he did not throw a TD pass. | <i>ARodgers:p:passing touchdowns = 0 and ARodgers:p:passes>0 and rest>=6 and date>=20081101</i> |
| Tony Romo is 0-9 ATS (-9.9 ppg) since December 2007 if not an underdog, coming off a game where he completed at least 73% of his passes. | <i>TRomo:p:completions/TRomo:p:passes>=.73 and date>=20071201 and line<=0</i> |
| Matt Stafford is 0-10 ATS (-8.3 ppg) in his career after a loss where they scored at least 14 points and he had 27-36 completions. | <i>p:L and p:points>=14 and 36>=MattStafford:p:completions>=27</i> |
| Russell Wilson is 10-0 ATS (10.3 ppg) in his career after a game where he completed at least 72% of his passes. | <i>RussellWilson:p:completions/RussellWilson:p:passes>=.72</i> |

PLAYER-BASED TRENDS: RBS

SportsBook
Breakers

While they don't affect a game to the same degree as a quarterback, running backs are important to the outcome, and can often be the key player in 20-25 plays a game. However, they are players that see their usage and success vary widely from one game to another, and can be very matchup dependent. In particular, previous usage volume is interesting in regards to running backs' performance. Below are 10 running back trends from some of the top ball carriers in the NFL.

| DESCRIPTION | SDQL TEXT |
|--|---|
| Jamaal Charles is 0-7 ATS (-11.4 ppg) when between a four-point favorite and nine-point dog, after a game where he ran for at least 110 yards. | <i>JamaalCharles:p:rushing yards>=110 and 9>=line>=-4</i> |
| Matt Forte is 0-7 ATS (-4.9 ppg) since November 2012 after a game where he had less than 15 carries. | <i>0<MattForte:p:rushes<15 and date>=20121101</i> |
| Arian Foster is 0-8 ATS (-7.4 ppg) when he had between four and 14 rushes last game. | <i>14>=Arian Foster:p:rushes>=4</i> |
| Chris Johnson is 0-11-2 ATS (-11.4 ppg) since December 26, 2010 after a game where he had at least 20 rushes for between 71 and 189 yards. | <i>ChrisJohnson:p:rushes>=20 and 189>=ChrisJohnson:p:rushing yards>=71 and date>=20101226</i> |
| Maurice Jones-Drew is 0-7 ATS (-10.2 ppg) in his career following a game where he ran for over 120 yards and had a rush of at least 39 yards. | <i>MJonesDrew:p:rushing yards>120 and MJonesDrew:p:longest rush>=39</i> |
| Marshawn Lynch is 12-0 ATS (13.1 ppg) since 2011 the week after a game where he ran for at least 113 yards. | <i>MarshawnLynch:p:rushing yards>=113 and NB and season>=2011</i> |
| Ryan Mathews is 8-0 ATS (15.5 ppg) since December 2011 with less than 10 days rest after a 100 yard rushing game. | <i>RyanMathews:p:rushing yards>=100 and date>=20111201 and rest<10</i> |
| LeSean McCoy is 0-10 ATS (-15.2 ppg) since 2011 when he had more than 80 rushing yards of at least 425 total yards of offense from his team last game. | <i>LeSeanMcCoy:p:rushing yards>80 and p:TY>=425 and season>=2011</i> |
| Demarco Murray is 0-7 ATS (-8.2 ppg) since November 20, 2011 after a game where he had more than 125 total yards. | <i>DeMarcoMurray:p:rushing yards+DeMarcoMurray:p:receiving yards>125 and date>=20111120</i> |
| CJ Spiller is 0-7 ATS (-8.1 ppg) after a game where he had more than 15 carries for between 45 and 135 yards. | <i>CSpiller:p:rushes>15 and 135>=CSpiller:p:rushing yards>=45</i> |

While wide receivers don't get the volume of touches as quarterbacks or running backs do, they are some of the most skilled players in the game. Additionally, they have unique big play ability. It is also a position with some of the clear-cut top players at the position from year-to-year. Below are 10 wide receiver trends from some of the best pass catchers in the NFL.

| DESCRIPTION | SDQL TEXT |
|---|--|
| Dwayne Bowe is 9-0 ATS (11.4 ppg) in his career coming off an away loss as no more than a 14 point dog where he had at least six receptions. | <i>DBowe:p:receptions>=6 and p:AL and p:line<=14</i> |
| Antonio Brown is 9-0 ATS (8.3 ppg) in his career after having more than 90 and less than 150 receiving yards last game. | <i>150>AntonioBrown:p:receiving yards>90</i> |
| Eric Decker is 9-0 ATS (13.5 ppg) with at least five days rest coming off a game where he had at least 90 receiving yards. | <i>Eric Decker:p:receiving yards>=90 and rest>=5</i> |
| AJ Green is 10-0 ATS (13.5 ppg) since November 2012 with 4-8 days rest after a game where they had at least 90 receiving yards. | <i>AJGreen:p:receiving yards>=90 and 8>=rest>=4 and date>=20121101</i> |
| Vincent Jackson is 7-0 ATS (11.1 ppg) in his career after a game where he had at least one catch but less than 15 yards. | <i>0<VJackson:p:receiving yards<15</i> |
| Andre Johnson is 0-10 ATS (-10.3 ppg) since 2008 after a game where he had at least 10 catches for at least 143 yards. | <i>AndreJohnson:p:receiving yards>=143 and AndreJohnson:p:receptions>=10 and season>=2008</i> |
| Calvin Johnson is 0-12-1 ATS (-7.3 ppg) in his career past week one when he caught at least seven passes against in a loss the last time he faced this team. Active weeks 5, 7, 8 and 14 in 2014. | <i>Lions:CJohnson:P:receptions>=7 and P:L and week>1</i> |
| Jeremy Maclin is 0-10 ATS (-15.1 ppg) in his career coming off a home game where he had at least six receptions. | <i>J Maclin:p:receptions>=6 and p:H</i> |
| Brandon Marshall is 0-14-1 ATS (-12.3 ppg) in his career following a game where he had at least 10 catches in a game where he had less than 12 days rest. | <i>BMarshall:p:receptions>=10 and p:rest<12</i> |
| Jordy Nelson is 8-0 ATS (11.8 ppg) after a game where he had just one catch for 18 or fewer yards. | <i>JordyNelson:p:receiving yards<=18 and JordyNelson:p:receptions=1</i> |

has proven to be one of the best handicappers in the business and has dominated the NFL the past three seasons.

Over that time, SportsBook Breakers has gone a huge +\$2283 with its selections.

When SBB really likes a play, you can really count on it. SBB top side and total of the week since the start of 2009 have combined to go 95-70-4 (57.6%). SBB is also best when the stakes are highest, going a huge 26-12 (68.4%) on its postseason plays the past three years.

SBB is known for having some of the best values handicapping in the business for both pro and college football. You can buy its Sunday NFL packages for just \$49 in web debit value or purchase its complete season package available before the season.

For some bettors, home teams can be fool's gold as the basis for a betting system. Home teams have actually covered in only 49.8% of games during the 25 years of database history. A larger number of bettors are keen on playing home dogs, who have performed better, covering in 51.2% of games. Still in most circumstances, that is not nearly enough of an edge to be a sole reason to play on a team.

Looking at the range of underdogs can help determine if there is a sweet spot to play on these home teams. To test this out, we will look at how teams perform in the SDQL using the grouping feature. The SDQL text "H and line>0, 2, 3, 4, 5, 6, 7" produces the following result, grouping performance together by lines greater than the given number. NOTE: Results date back to the beginning of the NFL database in 1989.

| Line | ATS | SU | # of Games |
|----------|---------------------------|---------------------------|------------|
| line > 0 | 979-932-65 (0.10, 51.2%) | 711-1264-1 (-4.56, 36.0%) | 1976 |
| line > 2 | 817-785-60 (-0.23, 51.0%) | 552-1109-1 (-5.49, 33.2%) | 1662 |
| line > 3 | 552-527-22 (-0.70, 51.2%) | 311-789-1 (-7.17, 28.3%) | 1101 |
| line > 4 | 414-381-18 (-0.65, 52.1%) | 210-602-1 (-8.11, 25.9%) | 813 |
| line > 5 | 343-311-16 (-0.54, 52.4%) | 166-503-1 (-8.57, 24.8%) | 670 |
| line > 6 | 273-235-14 (-0.04, 53.7%) | 127-394-1 (-8.71, 24.4%) | 522 |
| line > 7 | 174-136-4 (0.61, 56.1%) | 74-239-1 (-9.29, 23.6%) | 314 |

The ATS results clearly show that home dogs performance is nearly 50% at all lines until teams are more than a TD dog. While SU results naturally decline as the lines get larger, those large dogs are the ones that have performed well enough against the spread to show a positive result for all home dogs. Teams that are more than seven-point home dogs are 174-136-4 ATS (H and line>7).

Below is the breakdown of results by line above that TD threshold:

| Line | ATS | SU | # of Games |
|------|------------------------|------------------------|------------|
| 7.5 | 26-19-0 (-0.94, 57.8%) | 14-31-0 (-8.44, 31.1%) | 45 |
| 8 | 22-16-0 (0.89, 57.9%) | 13-25-0 (-7.11, 34.2%) | 38 |
| 8.5 | 11-17-0 (-2.43, 39.3%) | 6-22-0 (-10.93, 21.4%) | 28 |
| 9 | 16-14-0 (-0.47, 53.3%) | 5-24-1 (-9.47, 17.2%) | 30 |
| 9.5 | 23-14-0 (2.85, 62.2%) | 8-29-0 (-6.65, 21.6%) | 37 |
| 10 | 25-12-1 (2.32, 67.6%) | 10-28-0 (-7.68, 26.3%) | 38 |
| 10.5 | 11-8-0 (0.03, 57.9%) | 3-16-0 (-10.47, 15.8%) | 19 |
| 11 | 6-11-1 (-3.00, 35.3%) | 4-14-0 (-14.00, 22.2%) | 18 |
| 11.5 | 6-4-0 (-0.30, 60.0%) | 0-10-0 (-11.80, 0.0%) | 10 |
| 12 | 3-3-1 (3.29, 50.0%) | 2-5-0 (-8.71, 28.6%) | 7 |
| 12.5 | 3-1-0 (9.50, 75.0%) | 2-2-0 (-3.00, 50.0%) | 4 |
| 13 | 9-0-0 (12.00, 100.0%) | 3-6-0 (-1.00, 33.3%) | 9 |
| 13.5 | 2-2-0 (5.25, 50.0%) | 1-3-0 (-8.25, 25.0%) | 4 |
| 14+ | 11-15-1 (-1.65, 42.3%) | 3-24-0 (-16.81, 11.1%) | 27 |

In an era of parity, it is rare that any team should be made more than a TD underdog at home. In the more modern salary cap era, teams are bunched closer together. It stands to reason then, that this system would be even better over the more recent time frame. That is indeed the case, with home underdogs of more than seven points going 121-83-2 ATS since 1997.

Other things to consider:

- Factoring in three points each way for the home and road teams, it stands to reason a home team as more than a TD underdog is comparable to a road team that is more than a 13-point dog. Road dogs of more than 13 points have been solid as well, going 122-98-2 ATS (55.5%).
- This system has been a very strong 7-1 ATS during the opening week of the season. This makes sense as if there is ever a time where not enough is known about a team to make them such big underdogs, it is during week one. That carries on through the early season, going 53-34-1 ATS during the first six weeks of the season.
- Teams coming off a huge loss have dominated this system. These big home dogs off a loss by at least 27 points are 32-12-1 ATS (SDQL: H and line>7 and p:margin<=-27).
- It is harder to sneak up on a team when it is a primetime game. These huge home dogs in non-Sunday and Sunday night games are an average 27-25 ATS.

Summary:

In most cases, bettors should avoid the allure of betting heavily on home dog for that reason alone. However, when that team is an underdog by more than a touchdown, it is a green light to play on that team.

MTi's 2014 NFL Regular Season Win Report

Table of Contents:

1. The 2014 Futures Lines
2. 2014 Match-up Analysis
3. 2014 Scheduling Features
4. RSW Results 2010-2013

All of the information presented in this report was uncovered using the Sports Data Query Language (SDQL).

The Sports Data Query Language

Without it, You're Just Guessing.

1. The Futures Lines

Below are the NFL Futures lines from 5Dimes.com as posted on June 30, 2014. These 15-cent lines are what we used to perform the analysis in this report.

AFC EAST

New England Patriots: 10.5 (Over -170)
Miami Dolphins: 8 (Under -125)
New York Jets: 7 (Over -145)
Buffalo Bills: 6.5 (Over -150)

AFC NORTH

Cincinnati Bengals: 9.0 (Over -140)
Pittsburgh Steelers: 8.5 (Over -150)
Baltimore Ravens: 8.5 (Over -135)
Cleveland Browns: 6.5 (Over -155)

AFC SOUTH

Indianapolis Colts: 9.5 (Under -125)
Houston Texans: 7.5 (Over -130)
Tennessee Titans: 7 (Over -125)
Jacksonville Jaguars: 4.5 (Over -195)

AFC WEST

Denver Broncos: 11.5 (Under -130)
San Diego Chargers: 8 (Over -135)
Kansas City Chiefs: 6.5 (Under -130)
Oakland Raiders: 4.5 (Over -155)

NFC EAST

Philadelphia Eagles: 9 (Over -140)
New York Giants: 8 (Over -145)
Dallas Cowboys: 8 (Under -160)
Washington Redskins: 7.5 (-115 either way)

NFC NORTH

Green Bay Packers: 10.5 (Under -120)
Chicago Bears: 8.5 (Over -160)
Detroit Lions: 8.5 (Under -120)
Minnesota Vikings: 6 (Over -135)

NFC SOUTH

New Orleans Saints: 9.5 (Over -205)
Atlanta Falcons: 8.5 (Under -125)
Carolina Panthers: 8.5 (Under -140)
Tampa Bay Buccaneers: 7 (Over -125)

NFC WEST

Seattle Seahawks: 11 (Over -120)
San Francisco 49ers: 10.5 (Over -135)
Arizona Cardinals: 7.5 (Over -150)
St. Louis Rams: 7.5 (Over -145)

With this information, we can provide an approximate "ranking" for the divisions from toughest to weakest based on the number of wins they are expected to accumulate over the season. This ranking is given below, ignoring the juice:

| Projected 2013 Wins Ranked by Division |
|--|
| NFC West (36.5) |
| NFC North (33.5) |
| NFC South (33.5) |
| NFC East (32.5) |
| AFC North (32.5) |
| AFC East (32.0) |
| AFC West (30.5) |
| AFC South (28.5) |

Not much has changed from this year to the last. The NFC West is still expected to be the best division and the AFC South is expected to be the worst division the league for the third straight season.

This season, there are three divisions in which three of the four teams are expected to finish above 500; the AFC North, the NFC North and the NFC South. In this situation, the team ranked fourth in the division will have a tough time getting over their number, as every divisional opponent knows that the divisional race will be hard fought and that divisional games will be crucial. We look to play the Browns, Bucs and Vikings UNDER this season.

If you are ready to make the transformation from a victim to a client and from loser to winner, consider enlisting the services of MTi Sports Forecasting. At MTi, PhD scientists who are certified SDQL masters give you the edge over the linesmakers.

MTI'S 2014 RSW REPORT

At this point we are going to take a look at each team's expected number of regular season wins in 2014 and their actual number of regular season wins in 2013. The table below presents these data with the last column the difference between the two. The teams are ranked by the difference. At the top, we find the Texans, who are expected to win 5.5 more games than they did last season. The Redskins and Falcons are also expected to improve tremendously. At the bottom, we find the Chiefs, who are expected to win 4.5 games fewer than last season.

| Team | 2013 RSW | 2014 RSW Line | Difference |
|------------|----------|---------------|------------|
| Texans | 2 | 7.5 | 5.5 |
| Redskins | 3 | 7.5 | 4.5 |
| Falcons | 4 | 8.5 | 4.5 |
| Buccaneers | 4 | 7 | 3 |
| Browns | 4 | 6.5 | 2.5 |
| Packers | 8 | 10.5 | 2.5 |
| Lions | 7 | 8.5 | 1.5 |
| Vikings | 5 | 6 | 1 |
| Giants | 7 | 8 | 1 |
| Raiders | 4 | 4.5 | 0.5 |
| Jaguars | 4 | 4.5 | 0.5 |
| Bills | 6 | 6.5 | 0.5 |
| Rams | 7 | 7.5 | 0.5 |
| Bears | 8 | 8.5 | 0.5 |
| Ravens | 8 | 8.5 | 0.5 |
| Steelers | 8 | 8.5 | 0.5 |
| Titans | 7 | 7 | 0 |
| Dolphins | 8 | 8 | 0 |
| Cowboys | 8 | 8 | 0 |
| Jets | 8 | 7 | -1 |
| Chargers | 9 | 8 | -1 |
| Eagles | 10 | 9 | -1 |
| Colts | 11 | 9.5 | -1.5 |
| Saints | 11 | 9.5 | -1.5 |
| Patriots | 12 | 10.5 | -1.5 |
| 49ers | 12 | 10.5 | -1.5 |
| Broncos | 13 | 11.5 | -1.5 |
| Bengals | 11 | 9 | -2 |
| Seahawks | 13 | 11 | -2 |
| Cardinals | 10 | 7.5 | -2.5 |
| Panthers | 12 | 8.5 | -3.5 |
| Chiefs | 11 | 6.5 | -4.5 |

2. 2014 Match-up Analysis

The addition of the Houston Texans and a divisional realignment in 2002 made the NFL schedule much more organized. There are eight divisions in the league, each with four teams. Each team's schedule consists of a home and away game with each of the three other teams in their division. That's six games. Then there are predetermined divisional match-ups that rotate from season to season. This season's divisional schedule assignments are given below with the 2014 RSW lines for each division included for quick reference.

2014 Schedule Assignments:

| Division | Conference Opps From: | Non Conference Opps From: | Wild Card Opponents From: |
|-----------|-----------------------|---------------------------|---------------------------|
| AFC East | AFC West (30.5 wins) | NFC North (33.5 wins) | AFC South, AFC North |
| AFC North | AFC South (28.5 wins) | NFC South (33.5 wins) | AFC West, AFC East |
| AFC South | AFC North (32.5 wins) | NFC East (32.5 wins) | AFC West, AFC East |
| AFC West | AFC East (32.0 wins) | NFC West (36.5 wins) | AFC North, AFC South |
| NFC East | NFC West (36.5 wins) | AFC South (28.5 wins) | NFC North, NFC South |
| NFC North | NFC South (33.5 wins) | AFC East (32.0 wins) | NFC East, NFC West |
| NFC South | NFC North (33.5 wins) | AFC North (32.5 wins) | NFC West, NFC East |
| NFC West | NFC East (32.5 wins) | AFC West (30.5 wins) | NFC North, NFC South |

For example, this season the NFC East is scheduled to face every team the NFC West and every team in the AFC South. This adds another eight games to each team's schedule. Finally, there are two "wildcard" games. These are two conference opponents from the two divisions that the team does not face. The teams are matched by their position within the division from the previous season. That is, the first place teams match up against each other; the second place teams match up with each other etc. Below we present the order of finish of the four NFC divisions in 2013.

| Place | NFC East | NFC South | NFC West | NFC North |
|-------|----------|------------|-----------|-----------|
| 1st | Eagles | Panthers | Seahawks | Packers |
| 2nd | Cowboys | Saints | 49ers | Bears |
| 3rd | Giants | Falcons | Cardinals | Lions |
| 4th | Redskins | Buccaneers | Rams | Vikings |

Since the NFC East plays all the teams in the NFC West this season, they get their wildcard opponents from the NFC South and the NFC North.

So, this season, the Eagles' two wildcard opponents are the Panthers and Packers, the Cowboys' two wildcard opponents are the Saints and Bears, the Giants' two wildcard opponents are the Falcons and Lions, and the Redskins' two wildcard opponents are the Bucs and Vikings.

For comparison, the Eagles matched up with the Cardinals and Buccaneers as their two wild card opponents in 2013. Also, Minnesota's two wildcard opponents last season were the Panthers and Seahawks, so the Redskins and Rams are a significant drop in class. The Giants were the other team that drew the Panthers and Seahawks as wildcards in 2013, but this season they get the Falcons and Lions by virtue of their third place finish in the NFC East.

The NFC South plays all the teams in the NFC North this season, so they get their wild card opponents from the NFC East and NFC West. This means that the Panthers' two wild card opponents are the Eagles and Seahawks, the Saints' wild card opponents are the Cowboys and 49ers, Atlanta's two wild card opponents this season are the Giants and Cardinals and the Bucs' wild card opponents will be the Redskins and Rams.

The league decides the site of the wildcard games, although one is at home and the other is on the road.

A complete listing of each teams' wildcard match-ups for the upcoming 2014 season is shown in the table to the right.

Cincinnati's "reward" for winning the AFC North last season is the Patriots and the Broncos as their two wildcard opponents this season. Will the Bengals be up to this challenge?

Conversely, Houston's plummet in the standings last season got them the Bills and Raiders as their two wild card opponents this season. Last Season, the Texans' two wildcard opponents were the Patriots and Ravens.

The AFC had some tough third place teams last season, as the Dolphins, Ravens and Chargers all finished at 500 or better and in third place. This makes the Jaguars' wild card opponent's -- the Dolphins and Chargers -- tougher than a third-place team would normally draw. In the NFC, the Cardinals were the only third place team to finish at 500 or better.

The Rams were the best last place team in the league last season, finishing with a record of 7-9 (which was the same record as the Titans, who were second in the AFC South). As a result, St Louis gets last place teams in the NFC North and South, which were the Vikings and Buccaneers respectively.

Certainly, studying the 2014 wildcard match-ups for 2014 is an important part of playing NFL Season Win Totals.

| Team | Home Wildcard | Away Wildcard |
|---------------|---------------|---------------|
| Arizona | Lions | Falcons |
| Atlanta | Cardinals | Giants |
| Baltimore | Chargers | Dolphins |
| Buffalo | Browns | Texans |
| Carolina | Seahawks | Eagles |
| Chicago | Cowboys | 49ers |
| Cincinnati | Broncos | Patriots |
| Cleveland | Raiders | Bills |
| Dallas | Saints | Bears |
| Denver | Colts | Bengals |
| Detroit | Giants | Cardinals |
| Green Bay | Eagles | Seahawks |
| Houston | Bills | Raiders |
| Indianapolis | Broncos | Patriots |
| Jacksonville | Dolphins | Chargers |
| Kansas City | Titans | Steelers |
| Miami | Ravens | Jaguars |
| Minnesota | Redskins | Rams |
| New England | Bengals | Colts |
| New Orleans | 49ers | Cowboys |
| NY Giants | Falcons | Lions |
| NY Jets | Steelers | Titans |
| Oakland | Texans | Browns |
| Philadelphia | Panthers | Packers |
| Pittsburgh | Chiefs | Jets |
| San Diego | Jaguars | Ravens |
| San Francisco | Bears | Saints |
| Seattle | Packers | Panthers |
| St. Louis | Vikings | Buccaneers |
| Tampa Bay | Rams | Redskins |
| Tennessee | Jets | Chiefs |
| Washington | Buccaneers | Vikings |

MTI'S 2014 RSW REPORT

3. 2014 Special Scheduling Features

Of course, the most important factor that influences the difficulty of a team's schedule is the quality of their opponents. However, a team's opponents are known by all. It is difficult to get an advantage over the linesmakers with this information because the linesmakers have already factored the level of the team's opponent into the line for the Regular

Season Wins.

What is not factored into the line is the special scheduling information that is presented in the table below.

Here we present the number of times each team experiences a particular scheduling situation over the 2014 regular season.

The special situations involve each team's opponent. For

| Team | Opp has bye next | Opp off Bye | Opp Off Thurs | Opp has Thurs next | Opp Off Monday | Opp has Monday Next | Opp has Div. Bef & Aft | Opp in 2nd+ Away |
|---------------|------------------|-------------|---------------|--------------------|----------------|---------------------|------------------------|------------------|
| Arizona | 0 | 2 | 0 | 1 | 3 | 1 | 1 | 1 |
| Atlanta | 2 | 0 | 1 | 1 | 2 | 0 | 1 | 3 |
| Baltimore | 2 | 1 | 0 | 2 | 1 | 1 | 4 | 1 |
| Buffalo | 0 | 1 | 1 | 1 | 1 | 1 | 2 | 1 |
| Carolina | 0 | 0 | 1 | 0 | 1 | 1 | 1 | 4 |
| Chicago | 0 | 2 | 2 | 1 | 0 | 0 | 2 | 2 |
| Cincinnati | 0 | 0 | 1 | 2 | 1 | 1 | 2 | 1 |
| Cleveland | 0 | 1 | 1 | 1 | 0 | 2 | 2 | 2 |
| Dallas | 3 | 0 | 1 | 1 | 1 | 1 | 1 | 1 |
| Denver | 3 | 1 | 2 | 1 | 1 | 2 | 3 | 1 |
| Detroit | 1 | 1 | 1 | 2 | 2 | 0 | 1 | 1 |
| Green Bay | 0 | 2 | 0 | 1 | 2 | 1 | 1 | 2 |
| Houston | 1 | 0 | 2 | 1 | 0 | 1 | 0 | 3 |
| Indianapolis | 0 | 3 | 1 | 0 | 1 | 1 | 1 | 3 |
| Jacksonville | 1 | 0 | 0 | 1 | 1 | 1 | 1 | 1 |
| Kansas City | 0 | 1 | 0 | 3 | 0 | 1 | 2 | 1 |
| Miami | 2 | 1 | 2 | 0 | 0 | 1 | 2 | 3 |
| Minnesota | 1 | 2 | 1 | 0 | 2 | 0 | 3 | 2 |
| New England | 1 | 2 | 1 | 1 | 0 | 1 | 1 | 2 |
| New Orleans | 1 | 2 | 2 | 0 | 0 | 1 | 2 | 2 |
| NY Giants | 2 | 1 | 1 | 1 | 1 | 2 | 2 | 5 |
| NY Jets | 1 | 0 | 2 | 1 | 0 | 1 | 0 | 2 |
| Oakland | 1 | 1 | 1 | 0 | 1 | 1 | 1 | 1 |
| Philadelphia | 1 | 1 | 3 | 2 | 1 | 1 | 3 | 2 |
| Pittsburgh | 1 | 0 | 2 | 0 | 3 | 1 | 3 | 2 |
| San Diego | 0 | 2 | 1 | 1 | 1 | 1 | 1 | 1 |
| San Francisco | 2 | 0 | 1 | 1 | 1 | 1 | 1 | 1 |
| Seattle | 1 | 0 | 3 | 2 | 3 | 0 | 1 | 2 |
| St. Louis | 0 | 1 | 1 | 1 | 0 | 0 | 2 | 2 |
| Tampa Bay | 1 | 2 | 1 | 2 | 0 | 0 | 2 | 4 |
| Tennessee | 3 | 1 | 0 | 1 | 1 | 1 | 1 | 5 |
| Washington | 1 | 1 | 0 | 2 | 1 | 0 | 1 | 1 |

MTI'S 2014 RSW REPORT

example, the number of times a team gets an opponent off a bye week, before playing on the upcoming Thursday, off a Monday Night game the previous week and when they are facing a non-divisional opponent that is in a divisional "sandwich."

The table below gives the SDQL text for each of the eight situations presented in the table. The SDQL text is in bold.

| SDQL for the Eight Scheduling Situations |
|--|
| Opp has bye next: on:week = week + 2 |
| Opponent off Bye: op:week+2 = week |
| Opp Off Previous Thursday: op:day = Thursday and o:NB |
| Opp Plays Next Thursday: op:day = Thursday and on:NB |
| Opp Off Previous Monday: op:day = Monday and o:NB |
| Opp Plays Next Monday: op:day = Monday and on:NB |
| Opp in Div. Sandwich: NDIV and op:DIV and on:DIV |
| Opponent in 2nd away game: H and o:NB and op:A |

The teams are presented in alphabetical order by their home city in the first column. The second column gives the number of times they get an opponent with a bye week next. Low numbers here are better because teams with a bye next can focus 100% on their current opponent. Over the 2014 season, Dallas, Denver and Tennessee each get three opponents with a bye the following week and there are eleven teams that have no such opponents.

The third column gives the number of times a team gets an opponent that is off their bye week. It is best to have zero teams off a bye week, and there are ten teams this season with this scheduling advantage. The Colts have bad luck with regard to this scheduling situation, as they get three opponents that will have an extra week to prepare for them this season.

The fourth column gives the number of times a team gets an opponent off a Thursday Night game. This column was added in 2012 because of the addition of regular Thursday Night games. Clearly, a team would like to have zero opponents off a Thursday Night game simply because of the days rest disadvantage. There are seven teams in the league that get no opponents off a Thursday game and the Eagles and Seahawks have THREE such opponents – tops in the league.

The fifth column gives the number of times a team is facing an opponent that plays on the upcoming Thursday. This seems like a scheduling advantage, as the team playing on Thursday will be looking ahead to the nationally televised game with short rest. In 2014, there are seven teams in the league that get no opponents that play on the upcoming Thursday and the Chiefs are the only team in the league with three such opponents in 2014.

The next column presents the number of times a team gets an opponent off a Monday Night game. It is an advantage to have a large number of opponents off a Monday Nighter. There are ten teams in the league that will not enjoy this advantage this season. The scheduling bonanza in this category goes to the Steelers, Cardinals and Seahawks, each with three opponents who played on Monday Night the previous week.

Column seven gives the number of times a team gets an opponent that plays the next Monday Night. There are six teams in the league who have no such opponents and Browns, Giants and Broncos each gets two opponents looking ahead to a Monday Nighter the following week.

Column eight presents the number of times a team is facing a non-divisional opponent that has a divisional opponent both before and after. Since divisional games are more important, it is an advantage to face teams that are in a divisional sandwich. The Jets and Texans are the only two teams in the league have NO opponents in this scheduling spot while the Ravens get four teams sandwiched between opponents from their own division. The divisional sandwich is an important situation and could be the difference between a loss and a win. While this is not a big factor, it is one of many that should be considered because it is NOT already factored into the line.

The last column gives the number of times a team is hosting an opponent that is playing in at least their second road game in as many weeks. No teams have zero such opponents in 2014 and the Titans and Giants are hosting FIVE opponents that played on the road the previous week.

If the reader is going to use any of this information to make a futures play, it is a good idea to probe further into the scheduling situations presented here. After all, when playing futures you are looking for a situational advantage that has the potential to change the straight up outcome of the game.

For example, the Chiefs' three opponents who have a Thursday night game upcoming are the Chargers, Bills and Cardinals and all of these games are currently within two points of pick'em. When the Chiefs visit the Chargers in week 7, San Diego will be looking ahead to a game against Denver on Thursday (and Kansas City will be off their bye week). When the Chiefs visit the Bills in week 10, Buffalo will be looking ahead to a game in Miami on the upcoming Thursday. Finally, when the Chiefs visit the Cardinals in week 14, Arizona will play in St Louis on the upcoming Thursday. It is easy to imagine the Chiefs taking advantage of the fact that these three opponents have key divisional match-up with short rest on national TV. If the Chiefs get one extra win out of if this situation, it is HUGE because one game is very important when handicapping NFL season win totals.

A thorough analysis of these scheduling spots is certain to provide an edge over the linesmakers when playing Regular Season Win totals.

4. Regular Season Win Results 2010-13

As usual, we like to look at RSW results from previous seasons. The tables in this section gives the 2010, 2011, 2012 and 2013 NFL RSW results. The teams are ranked by the difference between the number of regular season wins and their regular season win line.

The team that had the highest RSW margin in 2010 was the

2010 NFL Regular Season Win Results

| Team | Line | Wins | Diff |
|---------------|------|------|------|
| New England | 9.5 | 14 | +4.5 |
| Atlanta | 9 | 13 | +4 |
| Tampa Bay | 6 | 10 | +4 |
| Kansas City | 6.5 | 10 | +3.5 |
| Chicago | 8 | 11 | +3 |
| Pittsburgh | 9 | 12 | +3 |
| Baltimore | 10 | 12 | +2 |
| Oakland | 6 | 8 | +2 |
| St. Louis | 5 | 7 | +2 |
| Philadelphia | 8 | 10 | +2 |
| N.Y. Jets | 9.5 | 11 | +1.5 |
| N.Y. Giants | 8.5 | 10 | +1.5 |
| Detroit | 5 | 6 | +1 |
| Jacksonville | 7 | 8 | +1 |
| New Orleans | 10.5 | 11 | +0.5 |
| Green Bay | 9.5 | 10 | +0.5 |
| Seattle | 7.5 | 7 | -0.5 |
| Cleveland | 5.5 | 5 | -0.5 |
| Indianapolis | 11 | 10 | -1 |
| Buffalo | 5 | 4 | -1 |
| Miami | 8.5 | 7 | -1.5 |
| San Diego | 11 | 9 | -2 |
| Washington | 8 | 6 | -2 |
| Houston | 8 | 6 | -2 |
| Tennessee | 8 | 6 | -2 |
| San Francisco | 8.5 | 6 | -2.5 |
| Arizona | 7.5 | 5 | -2.5 |
| Denver | 7.5 | 4 | -3.5 |
| Minnesota | 9.5 | 6 | -3.5 |
| Cincinnati | 8 | 4 | -4 |
| Dallas | 10 | 6 | -4 |
| Carolina | 7 | 2 | -5 |

Patriots, who at 14-2, went over their RSW (regular season win) line by 4.5 games. The most disappointing team in 2010 was the Panthers, who finished 2-14 with a RSW line of 7.

In 2011, San Francisco bested all expectations by going 13-3 when they were expected to finish 500 for the season. The biggest disappointment of 2011 was the Colts, but this line was before Manning was declared out for the season.

2011 NFL Regular Season Win Results

| Team | Line | Wins | Diff |
|---------------|------|------|------|
| San Francisco | 8 | 13 | +5 |
| Green Bay | 11.5 | 15 | +3.5 |
| New Orleans | 10 | 13 | +3 |

| N.Y. Jets | 10 | 8 | -2 |
| Philadelphia | 10 | 8 | -2 |
| San Diego | 10 | 8 | -2 |
| Cleveland | 6.5 | 4 | -2.5 |
| Minnesota | 6.5 | 3 | -3.5 |
| Tampa Bay | 8.5 | 4 | -4.5 |
| St. Louis | 7 | 2 | -5 |
| Indianapolis | 10 | 2 | -8 |

MTI'S 2014 RSW REPORT continued

In 2012, the biggest disappointment was the Eagles, which only won four games while projected to win ten. We are proud to say that our 2012 NFL Futures Play of the Year was Philadelphia UNDER 10 wins.

The team that was best on the positive end in 2012 was

the Colts, who finished 11-5 in Andrew Luck's rookie season.

Last season, both the Cardinals and Panthers performed much better than expectations. The Cardinals won ten games in the tough NFC West when they were only expected to win 5.5 and the Panthers were 12-4 when they were expected to be a tick below 500.

2012 NFL Regular Season Win Results

| Team | Line | Wins | Diff |
|---------------|------|------|------|
| Indianapolis | 5.5 | 11 | +5.5 |
| Denver | 8.5 | 13 | +4.5 |

| Washington | 8.5 | 3 | -5.5 |
| Houston | 10.5 | 2 | -8.5 |

MTI'S 2014 RSW REPORT continued

On the negative end, we find the Texans, who were a brutal 2-14 with a RSW line of 10.5 -- and they have no obvious excuse. The Falcons and Redskins also had seasons significantly below expectations.

At this point it seems natural to look at the combined results over the past four seasons to see what we can conclude. It is interesting to note that the Patriots are the lone team in the league that had not gone under their win total for four straight seasons.

On the disappointing end, we note that the Cowboys and Browns have stayed UNDER their RSW line in each of the last four seasons.

Teams that are currently on three-season OVER streaks include the Broncos, Bengals and 49ers and the only two teams that are currently on three-season UNDER streaks are the Jaguars and Giants.

To get the edge over the linesmakers all of this information AND the personnel and coaching changes much be taken into account. This is what we will be doing from now until about a week before the season starts when we release our 2014 NFL Futures Plays on KillerCappers.com.

2010-13 NFL RSW Summary

| | 2010 | 2011 | 2012 | 2013 | 10-13 |
|---------------|------|------|------|------|-------|
| New England | +4.5 | +1.5 | 0 | +1.5 | +7.5 |
| Seattle | -0.5 | 0 | +4 | +2.5 | +6 |
| Denver | -3.5 | +2 | +4.5 | +1.5 | +4.5 |
| San Francisco | -2.5 | +5 | +1 | +0.5 | +4 |
| Atlanta | +4 | -0.5 | +4 | -5 | +2.5 |
| Baltimore | +2 | +1 | +0 | -0.5 | +2.5 |
| Cincinnati | -4 | +1.5 | +2 | +2.5 | +2 |
| New Orleans | +0.5 | +3 | -3 | +1.5 | +2 |
| Chicago | +3 | -1.5 | +0.5 | -0.5 | +1.5 |

MTi will release its 2014 NFL futures about a week before the start of the season on KillerCappers.com.

This future play is just one of approximately six full futures plays SBB will release for this NFL season. SBB will also have several futures quick picks as well. Get these picks exclusively in August at Killercappers.com.

4-STAR Tennessee Under 7 wins - Tennessee is a team where if you put on very rosy-colored glasses, you can see some optimism. They have a developing quarterback, some potential offensively and a new coaching staff with experience. However, there are a lot of best case scenarios that would have to come into play for this team to reach .500 in 2014.

Let's start with a look back at the 2013 season. The Titans finished 7-9 and all indicators suggest that they did play at the level of a 7-9 or possibly 6-10 team. They played a huge number of close games, going 6-5 overall in games decided by a TD or less, and 1-4 in other contests. They don't have any strong outlier key figures that would significantly suggest that they were really better or worse than those seven wins last season.

People would likely assume the 2013 Titans were bit by injuries because they remember Jake Locker going down. However, that was one of just a few key injuries Tennessee faced last season. They were actually 6th in

the league in games lost to injury, after finishing in the middle of the pack in 2012.

However, that 2013 Titans team is not the same one being employed here. The face of the franchise on each side of the ball, Chris Johnson and Alterraun Verner are both gone. They did add some helpful role players including Michael Oher, Dexter McCluster, Shaun Phillips and Wesley Woodward, but there is a lack of top-end talent in Tennessee this season.

Getting back to Locker, we do like his talent and think he can have success. However, his injury concerns are very real, and there is no Ryan Fitzpatrick waiting in the wings this season, another key loss from last season. With Charlie Whitehurst and Zach Mettenberger, waiting in the wings should Locker get injured again, another serious injury to Locker would basically put seven wins out of reach.

There is some talent on the offensive side of the ball to go with Locker, but the breakout potential is being overstated for 2014. The Titans are built to rely on the run and they do have an offensive line that should be above average. However, Shonn Greene is no longer even an average runner and Bishop Sankey is a late second round rookie. At receiver, Justin Hunter and Kendall Wright have promise, but their realistic upside for the season would be an average receiving core, even with Hunter developing this season.

What really concerns us for Tennessee is the defensive side of the ball. Adding defensive coordinator Ray Horton is a solid move, but the issue is they just don't have the kind of talent and fits on defensive side to credibly run his system this season. We expect this to be a very tough transitional year on their defense, as bad fits are weeded out and the Titans hope some kind of leader emerges.

Let's look at the Titans 2014 schedule, broken down with preseason lines and expected win percentages for each game based on the lines and site each game, along with 25 years of historical winning percentages associated with those line and site combinations, provided after just a few clicks at Killersports.com:

SPORTSBOOK BREAKERS

breaks down a variety of factors when looking at futures as you can see, and it has paid off across all sports. Since the beginning of 2012, its futures plays across all sports are 20-11-1. This season, SBB will be releasing the its 2014 NFL Futures during August. These plays will be available at

www.killercappers.com

| Week | Opp | Site | Line | Win Expectancy |
|------|---------------|------|------|----------------|
| 1 | Chiefs | away | 6.0 | 0.261 |
| 2 | Cowboys | home | 2.5 | 0.525 |
| 3 | Bengals | away | 7.0 | 0.252 |
| 4 | Colts | away | 7.5 | 0.246 |
| 5 | Browns | home | -2.5 | 0.565 |
| 6 | Jaguars | home | -7.0 | 0.748 |
| 7 | Redskins | away | 3.5 | 0.359 |
| 8 | Texans | home | 0.0 | 0.513 |
| 10 | Ravens | away | 6.0 | 0.261 |
| 11 | Steelers | home | 2.0 | 0.465 |
| 12 | Eagles | away | 7.0 | 0.252 |
| 13 | Texans | away | 5.0 | 0.38 |
| 14 | Giants | home | 1.0 | 0.524 |
| 15 | Jets | home | -1.5 | 0.543 |
| 16 | Jaguars | away | -3.0 | 0.608 |
| 17 | Colts | home | 4.0 | 0.289 |
| | Total: | | | 6.79 |

Using these preseason lines, Tennessee is projected to win 6.79 games, slightly less than this listed total. They are favored just four times in 2014, but the bigger issue is

that they are favored by more than a field goal just once. It is hard for a team to pile up wins when they don't have many easy games on the schedule, and Tennessee has just one game where they are expected to have better than 61% chance at victory.

You hear that the AFC South is an easy division, but a lot of that has to do with Tennessee not being very good, along with Jacksonville's struggles. If Houston rejoins Indy near the top of the division, things won't be particularly easy in the AFC South. Playing the AFC North is a tough draw, and there is no easy NFC division to play, with the Titans getting the East. Also due to their second place finish last season, Tennessee will face the Jets and a tough road trip to Kansas City. That trip to Kansas City starts off a brutal season-opening stretch where they also travel to Cincinnati and Indianapolis in the first four weeks in the season. A 1-3 start is likely and 0-4 is certainly possible, putting the Titans behind the 8 ball from the get go. Also keep in mind that last season, they played just the 22nd ranked schedule in football, so it is not as though there is great room for their schedule to get easier than in 2013. There is no way the division will be worse than it was last season, and they still won just seven games with a better team than this one..

This is going to be a transitional year in Tennessee, and not one that sees too many wins.

SPORTSBOOK BREAKERS PREDICTION: Tennessee 5-11

SportsBook Breakers has teamed up with Killersports to provide two great ways to get all the information you need to know weekly for the 2014 NFL season.

1. Subscribe to the 12-pg 2014 Killersports.com Weekly NFL Newsletter for less than \$10 per week.

(see the page 4 for more details)

2. Sign up for the FREE Friday Football tipsheet by checking the "E-mail me the free KillerSports.com Newsletters" box on your account profile page at Killersports.com.

Four Perfect NFL Systems

Here we present FOUR perfect systems in past performance from MTi Sports Forecasting. A system, conventionally, applies to the league as a whole whereas a trend applies to a particular team.

These systems are a tiny sampling of the NFL systems stored in MTi's personal "My NFL Trends" file at KillerSports.com. At about 3:00 am Tuesday morning the computer runs through the THOUSANDS of trends in MTi's personal saved trend file and outputs which of the stored trends and systems are active for the upcoming week. This is how MTi Sports Forecasting STARTS their handicapping protocol — with a complete list of league-wide multi-season, proven systems that apply to games in the upcoming week of action.

MTi does not have any special access to the Saved Trend Feature at KillerSports.com. Anyone can store their personal trends at KillerSports.com and they will be automatically run by the KillerSports.com servers every week for the entire season. The first two stored trends are free and thereafter it is \$2/trend for the entire season.

To learn how to save trends in your "My NFL Trends" file, watch a "How-To" video in Query Video archive at KillerSports.com. Here is a brief description: To save a trend in your personal "My

NFL Trends" file, first login at KillerSports.com, go to the appropriate query page, run the query and then click on:

save to personal trends

You will then have the opportunity to enter a description of the trend or system. For example, if you want to save the first system on the following page, you would run this SDQL text:

AD and p:OT>0 and p:A and season>=2009

And then type in a description of the situation. You could simply type: MTi's Annual System #1, or you could type the entire description of the trend, "Since 2009, road teams are 17-0-2 ATS off a road overtime loss. "

Whenever this trend is active, it will appear in your personal "My NFL Trends" listing at KillerSports.com. NO ONE else will have access to the information in your personal "My NFL Trends" file.

The time to develop a library of valuable trends and systems is during the off-season. Go into the NFL season with an arsenal of information that will put you in a great position to start your handicapping.

Play Smart. Play Informed.

The NFL SDQL Video Query of the Day

To watch 1-2 minute videos of queries being performed, visit:

SDQLConsultancy.com

and click on the NFL link in the menu bar.

MTi Sports NFL System #1 - 17-0-2 ATS System

Since 2009, road teams are 17-0-2 ATS off a road overtime loss.

System Analysis

When making any investment, it is important to have "inside" information. That is, information that is not reflected in the price of the investment. This is what gives you an advantage.

The fact that a team is playing on the road off an overtime loss is NOT inside information. The bettors all know this and more importantly, the linesmakers know this. This information cannot possibly give you an advantage over the linesmakers.

Nonetheless, many bettors will play against a team because they are on the road off a road overtime loss. The linesmakers know that the bettors are going to want to play against these teams and they adjust the line accordingly. This has actually made playing ON these teams a good investment.

Normally, an NFL road team gets an average of 2.6 points from the linesmakers. This is the standard, "home-field" advantage.

However, since 2009, a road team off a road overtime game is getting an average of 5.6 points from the linesmakers!

Is the fact that a team is off a road overtime game really worth a field goal?? Apparently not, as these teams are 17-0-2 ATS over the past five seasons. The SDQL text for this situation is shown below:

AD and p:OT>0 and p:A and season>=2009

A complete game listing for this system is given below. A quick scan over the games reveals that this was active in the 2011 Super Bowl and in last season's playoffs when Andrew Luck added to his burgeoning reputation for thrilling comebacks to prevent this system from adding on another winner.

Watch for it to occur in 2014, or simply save it in your "My NFL Trends" file.

SU: 12-7-0 (1.89, 63.2%)

MTi Sports NFL System #2 – OU System

Road favorites are 28-0 OU (+16.12) the week following a win by more than a TD as a favorite in which they rushed for a TD, benefitted from at least three penalties and had at least two more minutes of possession time than their season-to-date average.

System Analysis

The basic situation we are looking at here is a road team off a controlling victory. Specifically, these road favorites are off a win by more than a TD in which they had at least two more minutes of possession time than their season-to-date average, rushed for a TD and benefitted from at least three penalties.

The SDQL text is:

AF and p:F and NB and p:TOP - tA(p:TOP)>120 and p:RTD>0 and o:PEN>=3 and p:margin>7 and date>=20101225

A road favorite in this spot has to be feeling confident. Their defense is well rested, they ran the ball into the end zone at least once and their opponent committed a few penalties to help them along.

It would be easy to assume that a team with a fresher defense will play better defense, but the actual results do not bear this out. It appears that teams with a lot of possession time in an easy win suffer a drop in defensive intensity in their next game. This has resulted in a lot of points being scored on both sides of the ball.

What is remarkable about this system is the average margin. In these 28 games, teams have gone over by an average of 16.1 ppg.

The average OU line has been 45.2 and the average final score has been 32.3 to 29.0.

Last year, this system was active on NINE occasions and every one went

over by AT LEAST a TD, as can be seen by the complete game listing on the next page.

In 2012, this system was active eight times and produced eight winners. Therefore, we can expect it to be active a number of times this season. For this reason, we include blank spaces at the bottom of the game listing for you to fill in the results as they come in.

It is a simple task to save this system in your personal “My NFL Trends” file at KillerSports.com.

When it is saved in your personal “My NFL Trends” trend file, it will show as ACTIVE in the listing of your trends by early Tuesday morning of each week. At this writing the first two saved trends are free and each one thereafter is \$2 for the entire season.

There are a few professional handicappers who have well over 500 saved trends in a few different sports.

At MTi Sports Forecasting, we start every handicapping session in every sport with a look over the active trends and systems in our “My Saved Trends” file.

Imagine how helpful it would be if you could start handicapping by scanning down a listing of YOUR hand-picked trends and systems that are active for the upcoming action.

You can start with the trends and systems you like in this book. If you see a team trend, player trend or league wide system that you like, run it and save it.

For video instructions on saving trends in your personal “My NFL Trends” file, visit the Query Video Archive at KillerSports.com.

NFL KILLER SYSTEM #3

MTi Sports NFL System #3 - 20-0-1 ATS System

*The league is 0-20-1
ATS (-8.8 ppg) as a dog
in week one when they
were eliminated from the
playoffs in the first round
last season, as long as
the total is higher than
37.*

System Analysis

Here we present a WEEK-ONE ONLY system that has been cashing for us season after season. The basic strategy is to play against a week-one underdog that was eliminated from the playoffs in the first round the previous season.

More specifically, NFL teams are 0-20-1 ATS (-8.8 ppg) since the 2004 season as a dog in week one when they were eliminated from the playoffs in the first round last season, as long as the total is higher than 37.

These playoff teams that are getting points have been significantly over-estimated by the linesmakers. In addition,

their opponent takes them very seriously and as a result has won 21 straight games in this spot and gone 20-0-1 ATS.

The SDQL text is:

week = 1 and Sum(playoffs@team,N=2) = 1 and D and total>37 and season>=2004

A complete game listing for this system is given below. It reveals that the system has been active at least twice in each of the past six seasons. At the bottom of the listing, there are two active dates for this season based on the current lines. These games should be bettable as you read this, so get in early and follow the lines as gameday approaches.

SU: 0-21-0 (-13.43, 0.0%)
ATS: 0-20-1 (-9.21, 0.0%)
O/U: 14-6-1 (3.64, 70.0%)

avg line: 4.2
avg total: 43.8

NFL KILLER SYSTEM #4

MTi Sports
Forecasting

MTi Sports NFL System #4 - 18-0 ATS System

AFC East teams are 0-18 ATS since 1994 in September when they are off a Sunday game vs the Dolphins.

System Analysis

Here we present a very simple early-season system involving AFC East teams off a game vs their divisional rival, the Miami Dolphins, the previous Sunday.

Since 1994, AFC East teams are 0-18 ATS in September when they are off a Sunday game vs the Dolphins the previous week. These teams were favored in eight of the eighteen games, but they lost every one straight up.

It sure looks as if AFC East teams are either physically and/or emotionally drained the week after facing the Dolphins early in the season.

The SDQL text for this situation is:

po:team=Dolphins and month=9 and division=AFC East and NB and season>=1994 and p:day=Sunday

A complete game listing for this system is given below. The last two qualifying games include the Bills' 34-7 loss to the Packers and the Jets' 34-0 loss to the 49ers.

Teams in this spot have fallen short of the number by an average of 11.4 ppg and have lost by an average of 13.1 ppg.

At the bottom of the listing, there are two active upcoming dates.

Follow these lines as gameday approaches, so you can take advantage of this opportunity.

SU: 0-18-0 (-13.06, 0.0%)
ATS: **0-18-0 (-11.42, 0.0%)**
O/U: 6-12-0 (-0.31, 33.3%)

avg line: 1.6
avg total: 39.2

Introduction to NFL Teaser Wagering

There are many events upon which one can wager on the outcome. There are horse races, dog races, lotteries, dice games, card games, sporting events and much more. Some of these are pure luck whereas others involve a certain degree of skill and intelligence. The “luck” games include the lottery, craps, keno and roulette. The “skill” games include poker, blackjack, horse racing and, of course, betting on sporting events. In the luck events, no person has an advantage over any other — anyone can win the lottery. In the skill games the bad players lose their money fast and the good players can win money, or at least lose it more slowly.

If you want to see someone lose their money fast, watch a bad poker player, a bad blackjack player or a bad deuces wild video poker player. Conversely, you can step up to the roulette table and have as good a chance of getting a RED 3 as anyone else at the table. The casinos and sportsbooks will only continue to offer wagering on games of skill if they make money on them. That is, as long as the betting public — on the average — does not get skilled enough to beat the game the casino will continue to provide their customers the opportunity to bet on it. If all the blackjack players played perfectly the casino would have to stop providing blackjack or at least adjust the rules so they are more favorable for the casino. In this manner, blackjack and NFL teasers are very much alike.

There are enough bad NFL teaser players to provide the both the sportsbooks and the skilled players ample profit. In other words, betting NFL teasers is a beatable game of skill. If you become a skilled NFL teaser player and the rest of the betting public remains bad, you have a tremendous money making opportunity.

A teaser bet is one where you move the line a given number of points in a number of games. For the bet to be

a winner, all the teams you used in the bet must cover the adjusted spread for the bet to be successful (wins and a push in multiple team teasers can be winners as well). For example, in a six-point, two-team teaser you get to move the line six points in two games and both teams you select must cover the adjusted spread for your teaser to win. At most sportsbooks a push and a win in a two-team teaser is a push. Similarly, in a three-team, ten-point teaser, you get to move the line ten points in three separate games. If all three teams selected cover the adjusted spread, your teaser is a winner. The typical price for a 3-team, 10-point teaser is 120-for-100.

The team of PhD scientists at MTi Sports Forecasting have been MURDERING NFL teasers for about 25 years now.

In 1990, Dr Ed Meyer, the chief handicapper at MTi Sports Forecasting, was the author of a six-part series for the Card Player Magazine on how to beat NFL teasers. In fact, the vulnerability of NFL teasers to intelligent betting strategies was the reason that the PhD physicists started MTi Sports Forecasting.

The New Yorker magazine’s lead cover story of the April/May 1999 issue was “Brainiacs Build Money Machine.” The article mentions the success of Meyer’s computer program to uncover inefficiencies in the NFL betting market. In the 1990s MTi hit about 65% of their 6-point teasers and they were even-money back then!

Over the past 25 seasons, MTi’s 6-pointers have continued to make money, and recently, their 10-point, three-teamers have been nothing short of spectacular.

In this article, we will start by describing the teaser bet, then will provide some general rules for teaser betting. Finally, we will present some 10-point teaser trends and a nice 39-0 ATSp10 system that has not lost in ten seasons.

1.0 The Edge You Need To Win

The sportsbook's take from unskilled teaser players is much higher than their take from unskilled straight bettors. An unskilled straight bettor will win about 50% of his plays (ignoring pushes) whereas an unskilled 6-point, 2-team teaser player will win only 47.8% of his plays (again, ignoring pushes). So, just as an unskilled casino gambler is better off playing craps than blackjack, an unskilled football bettor is better off playing straight bets rather than teasers. However, just as skilled card players can beat blackjack, skilled teaser players can beat teasers — and it's a lot easier to pick teaser winners than count a six-deck shoe.

To qualify for a good six-point teaser play, the extra six points should increase a team's chance of covering by about one-fourth and an extra ten points should increase a team's chance of covering by about one-third. In this statement we find the key to successful teaser wagering. The trick to beating teasers is to make your extra points count. You want the probability that the extra points will turn an ATS loser into a teaser winner to be as high as possible. For a six-point teaser it should be at least 25% and for a ten-point teaser it should be at least 33%. For example, when teasing a team from +6' to +12', there should be at least a 25% chance that the team will lose by 7, 8, 9, 10, 11 or 12 points. The losing margins from 7 to 12 points turn an ATS loser into a teaser winner.

Similarly, when teasing a team from -2' to +7' in a ten point teaser, there should be at least a 33% chance that the team wins by 1 or 2 points, ties, or loses by fewer than 7 points — thus turning an ATS loser into a teaser winner. Because all games in which the result falls with the teaser

point range are teaser winners, it is important to use games whose actual result will very likely fall close to the Vegas line. This is the overarching theme of teaser success. There are a number of ways to identify and isolate such games.

2.0 General Teaser Betting Strategy

When playing teasers, it is better to use teams that will keep it close to the line — they won't get blown out. Teams that are good candidates to use in teaser plays are teams that play sound defense and don't turn the ball over on offense. They have a veteran quarterback who does not throw risky passes. Good teaser teams have veteran coaches who preach sound fundamentals. Good teaser teams play the entire 60 minutes. They do not get discouraged and "mail in" the fourth quarter if they find themselves down by double digits. Good teaser teams are reliable and consistent. The reason why the most teaser players lose money is that they try to pick the ATS winner and then play it in a teaser. Note that all the proper strategies do not involve picking the side winner. The major downfall of many teaser players is that they handicap the sides first and then use the sides they selected in teaser plays. Picking a good team to use in a teaser is completely different from picking a team that will cover the spread. To handicap teasers, you should not try to pick the ATS winner of the game. If you think you have the ATS winner, don't play a teaser, play a straight bet. After all, the other team(s) in the teaser may lose making your entire teaser bet a loser. The rule of teaser betting is simple — If you think that the result will be close to the line, play a teaser. If you think the result will be far from the line, play a straight bet.

MTi's 10-point, 3-team teasers are 32-10 over the past three NFL regular seasons!!

MTi's 6-point, 2-team teasers were 31-10 in 2013!!

Put the power of the SDQL and a team of PhD scientists in your corner in 2014.

MTi's Teasers are Available Only at killercappers.com.

3.0 Teaser Dos and Don'ts

Here we present a number of general teaser better Dos and Don'ts. These are general rules-of-thumb. It is challenging to find a teaser play in which all of the Dos and none of the Don'ts are adhered to. The key is to understand the philosophy behind these general guidelines when selecting teaser plays. We'll start with the Dos.

DO use teams that play the entire 60 minutes. Teams that get discouraged when trailing at the half and effectively "throw in the towel" are not good teams to use in teaser plays. Select a team that gives 100% the entire game on both sides of the ball. This is especially true near the end of the season when some teams might have given up altogether.

DO use teams with good, fresh defenses. With an extra six points the key is not to allow the opponent to score a ton of points. If the defense was on the field a lot in a close game last week they might be a bit nicked up and not fully recovered. This is especially true if the game last week was a key divisional match-up.

DO tease the OPPONENT of a favorite that plays conservatively with a lead. Some coaches play very conservatively with a lead — especially on the road. They run the ball almost exclusively in an attempt to keep the clock moving. This will keep the game from getting out of hand. For example, taking a 9 point dog to +15 is a good play when the favorite is going to play conservatively with a lead.

DO take the underdog in games that have a low total. When the final score is expected to be something like 14-13, 20-17, 17-14, 20-14 etc., taking the dog plus the extra points is a good strategy.

DO take a home favorite that has the personnel and the mindset to secure the victory if not the cover. These teams do not like to get embarrassed in front of their home fans. The Ravens have been a terrific team to tease at home. They are disciplined and they are well coached.

DO know the current teaser records of every team in the league. There are good teaser teams and there are poor teaser teams. Knowing which are which is key to successful teaser handicapping. Remember, the teaser rating of a team can be a strong function of whether they are playing at home and whether they are favored.

DO follow the teaser trends. One of the reasons that trend handicapping is scoffed at by some is that the linesmakers know the trends and adjust the line accordingly. However, very few people use teaser trends

and there is no teaser-specific line — the line for the side is used in teaser bets. That is, the linesmakers can't adjust the line for teasers without adjusting the line for the side. This gives teaser players a significant advantage.

DO use teams that can protect their quarterback. A quarterback that is continually under pressure has the potential to fumble and throw interceptions. Remember, if your team does not have a bad turnover margin, they are very likely to cover with extra points.

DO tease divisional match-ups. Teams within the same division know each other well and the linesmakers know how the teams match-up against each other. Hence the line for these games are, in general, more precise than the lines for inter-conference match-ups. This makes divisional match-ups better teaser plays, in general, than inter-conference match-ups.

MTi Sports Forecasting
is the established
leader in NFL teaser
handicapping.

**Put the analytical power of the SDQL
and PhD scientists in your corner!**

Now let's examine some teaser No-Nos.

DO NOT tease the dog vs a high scoring team. Teasing the dog against high powered offenses like those of the Saints or Patriots is not a good idea as they can easily get over the extra points you are getting with a teaser.

DO NOT tease a team with an inexperienced quarterback. Fumbles and interceptions are the bane of teasers. Veteran quarterbacks run out of bounds, slide feet first and throw the ball into the stands when necessary. This might prevent a first down but it also prevents the dreaded interception or fumble return for a touchdown – the evil killers of teaser plays.

DO NOT handicap a side and then use it in a teaser for “insurance.” Teaser handicapping is very different than side handicapping. When handicapping a side, NY Jets -2 over Chicago for example, you ask yourself, is the Jets -2 or is Chicago +2 better than 52.4% to win. When handicapping teasers, the questions you ask yourself are: is the Jets +4 better than a 72.4% play and are the Chicago +8 better than a 72.4% play. It's completely different. In general, the reason why you play a side is that you feel the line is inaccurate and the reason you play a teaser is that the line is accurate.

DO NOT use road dogs vs a non-divisional opponent when they host a key divisional opponent the following week. Here we have a possible look-ahead situation. If the team gets down vs a non-divisional opponent on the road they may begin to look-ahead to next week's divisional game and not concentrate on the task at hand. It would be frustrating to have teased a team from +3' to +9' and watch them lackadaisically go out on offense inside of two minutes trailing 10-21.

DO NOT tease teams that were eliminated from the playoffs the week before. It is sometimes difficult to predict the effect of being eliminated from post-season play will have on a team. If you are a good enough handicapper to tell, play the team in a straight bet – not in a teaser.

DO NOT tease a team that has a key player injured. Teasers should be played in games where the result will be close to the line. It is difficult to predict how teams will respond to a key injury. If you think you know how the team will respond to the injury – play the side rather than use it in a teaser.

DO NOT tease a game where the weather is expected to be bad. Rain, wind and snow introduce intangibles that make the result more unpredictable. Remember, if the game goes as forecast, all teaser plays are winners. Only when the result is far away from the line does a teaser play potentially lose. Bad weather increases the chance of this occurring.

DO NOT tease a game in which a coach is trying out a new tactic or strategy. A new tactic may work very well or it may be a disaster. If you think you know, play the side. Do not use it in a teaser, as the extra points you get are not likely to make a difference and the extra points is why you are playing a teaser.

DO NOT tease a game in which a team is desperate. Desperate teams often employ drastic measures. They will go for it on fourth down in their own territory, try a fake punt, a double reverse, flea flickers, the halfback option, onside kicks, the statue of liberty and perhaps even the fumblerooski. All this leads to unpredictable results.

A great place to find teaser trends is the Killersports.com Weekly Newsletter. Each week, the newsletter features some of the top active teaser trends in that upcoming week's games.

4.0 Team Teaser Records

One of the teaser Dos was to know the good teaser teams. Here we present a table of teaser results for each team in the league over the 2013 regular season. The first table is for six point teasers and the second table is for ten-point teasers. The results given are for overall, home and away. Only regular season results are included and the teams are ranked in each category. In the 6-point teaser table we see that the team with the best record with an extra six-points in 2013 was the Cardinals, who were 14-1-1 ATSp6. At the bottom of this column we find the Redskins who were 6-9-1 ATSp6 in 2013. In the next

column, we find that the Panthers, Saints and Bengals were all a perfect 8-0 ATSp6 at home last season, but the Bengals were 8-0 ATS at home during the regular season without the extra six points. At the bottom, we find the Browns, who were 3-5 ATSp6 at home in 2013.

In the Away column, we see that the Chiefs were the only perfect teaser team on the road over the 2013 regular season and the Redskins were 3-5 ATSp6 in 2013, the worst in the league.

The team with the biggest home away dichotomy in 2013 was the Bills, who were a very nice 7-1 ATSp6 at home, but a terrible 3-4 ATSp6 on the road. These dichotomies can provide good betting opportunities for the astute handicapper.

2013 ATSp6 Regular Season Records

| Team | ATSp6 | Team | ATSp6 Home | Team | ATSp6 Away |
|-------------|--------|-------------|------------|-------------|------------|
| Cardinals | 14-1-1 | Panthers | 8-0-0 | Chiefs | 8-0-0 |
| Bengals | 14-2-0 | Saints | 8-0-0 | Cardinals | 7-1-0 |
| Chiefs | 14-2-0 | Bengals | 8-0-0 | Titans | 7-1-0 |
| Panthers | 14-2-0 | Cardinals | 7-0-1 | Broncos | 7-1-0 |
| Broncos | 13-3-0 | Bears | 7-1-0 | Fortyniners | 7-1-0 |
| Bears | 13-3-0 | Bills | 7-1-0 | Chargers | 6-1-1 |
| Fortyniners | 13-3-0 | Cowboys | 7-1-0 | Bengals | 6-2-0 |
| Saints | 13-3-0 | Rams | 7-1-0 | Dolphins | 6-2-0 |
| Chargers | 12-2-2 | Ravens | 7-1-0 | Raiders | 6-2-0 |
| Titans | 12-3-1 | Chargers | 6-1-1 | Seahawks | 6-2-0 |
| Dolphins | 12-4-0 | Colts | 5-1-2 | Eagles | 6-2-0 |
| Cowboys | 12-4-0 | Broncos | 6-2-0 | Panthers | 6-2-0 |
| Seahawks | 12-4-0 | Fortyniners | 6-2-0 | Lions | 6-2-0 |

| Patriots | 11-5-0 | Patriots | 6-2-0 | Steelers | 6-2-0 |
| Lions | 11-5-0 | Chiefs | 6-2-0 | Bears | 6-2-0 |
| Vikings | 11-5-0 | Seahawks | 6-2-0 | Patriots | 5-3-0 |
| Steelers | 11-5-0 | Dolphins | 6-2-0 | Giants | 5-3-0 |
| Ravens | 11-4-1 | Vikings | 6-2-0 | Packers | 5-3-0 |
| Colts | 10-4-2 | Titans | 5-2-1 | Vikings | 5-3-0 |
| Bills | 10-5-1 | Lions | 5-3-0 | Falcons | 5-3-0 |
| Raiders | 10-6-0 | Steelers | 5-3-0 | Saints | 5-3-0 |
| Packers | 10-6-0 | Buccaneers | 5-3-0 | Cowboys | 5-3-0 |
| Jaguars | 10-6-0 | Falcons | 5-3-0 | Rams | 5-3-0 |
| Jets | 10-6-0 | Packers | 5-3-0 | Browns | 5-3-0 |
| Falcons | 10-6-0 | Giants | 4-3-1 | Colts | 5-3-0 |
| Eagles | 10-6-0 | Jaguars | 4-4-0 | Ravens | 4-3-1 |
| Giants | 9-6-1 | Eagles | 4-4-0 | Buccaneers | 4-3-1 |
| Buccaneers | 9-6-1 | Raiders | 4-4-0 | Texans | 4-4-0 |
| Browns | 8-8-0 | Texans | 4-4-0 | Jets | 4-4-0 |
| Texans | 8-8-0 | Redskins | 3-4-1 | Bills | 3-4-1 |
| Redskins | 6-9-1 | Browns | 3-5-0 | Redskins | 3-5-0 |

TEASER WAGERING continued

For the 10-pointers, we will expand the results to include the past two seasons. The first column reveals that the Seahawks and Patriots have been excellent ten-point teaser teams over the past two seasons. These teams rarely get embarrassed and this is exactly what you need when playing 10-point teasers. Note that all the teams near the top of the ten-point teaser columns are consistent, solid teams – most with good defenses. Note further that inconsistent teams that don't have a good QB are at the bottom of this list.

At home, the Bears and the Bengals are a perfect 16-0 ATSp10 over the past two seasons. Cincinnati has the longest regular season ATSp10 streak at home, as they

have covered 27 straight in Cincinnati with an extra ten points. The Jaguars, on the other hand are only 7-9 at home with an extra ten points over the past two seasons. Brutal.

On the road, it is the Patriots and Seahawks that have been perfect with an extra 10 points over the past two seasons and that the Seahawks have the longest road ATSp10 streak going at 21 straight.

It is worth noting that the Jaguars have the biggest home-away difference, as they were 13-2-1 ATSp10 on the road but only 7-9 ATSp10 at home over the past two seasons.

Now let's look at some teaser-specific team trends.

2012-13 ATSp10 Regular Season Records

| Team | ATSp10 | Team | ATSp10 Home | Team | ATSp10 Away |
|-------------|---------|-------------|-------------|-------------|-------------|
| Seahawks | 30-2-0 | Bears | 16-0-0 | Seahawks | 16-0-0 |
| Patriots | 30-2-0 | Bengals | 16-0-0 | Patriots | 16-0-0 |
| Broncos | 29-2-1 | Colts | 15-1-0 | Chargers | 15-1-0 |
| Bears | 28-3-1 | Broncos | 14-1-1 | Broncos | 15-1-0 |
| Chargers | 28-4-0 | Cardinals | 14-2-0 | Browns | 14-1-1 |
| Bengals | 28-4-0 | Bills | 14-2-0 | Steelers | 14-1-1 |
| Steelers | 27-4-1 | Dolphins | 14-2-0 | Rams | 14-2-0 |
| Panthers | 27-5-0 | Panthers | 14-2-0 | Packers | 14-2-0 |
| Cardinals | 27-5-0 | Patriots | 14-2-0 | Jaguars | 13-2-1 |
| Packers | 27-5-0 | Seahawks | 14-2-0 | Panthers | 13-3-0 |
| Dolphins | 27-5-0 | Falcons | 14-2-0 | Dolphins | 13-3-0 |
| Colts | 26-5-1 | Cowboys | 14-2-0 | Ravens | 13-3-0 |
| Bills | 26-5-1 | Saints | 13-2-1 | Cardinals | 13-3-0 |
| Cowboys | 26-6-0 | Buccaneers | 13-3-0 | Bills | 12-3-1 |
| Falcons | 26-6-0 | Lions | 13-3-0 | Fortyniners | 12-3-1 |
| Rams | 26-6-0 | Packers | 13-3-0 | Bears | 12-3-1 |
| Ravens | 26-6-0 | Vikings | 13-3-0 | Cowboys | 12-4-0 |

| Jets | 19-13-0 | Jaguars | 7-9-0 | Jets | 9-7-0 |

10-POINT TEAM TEASER TRENDS

MTi Sports
Forecasting

5.0 Teaser Trends

In this section, we'll present some impressive 10-point teaser trends. As far as we know, no other handicapper uses teaser-specific trends when handicapping teasers — most teaser bettors handicap the game like they normally would and then use the same games in their teaser plays.

This strategy should not be successful, as teaser handicapping is very different than handicapping sides. When handicapping teasers, you don't need the team to win, all you need is a team that will give an honest effort; a team that won't commit

four-plus turnovers and a well-coached team that will not give up in the second half.

For example, the Ravens just don't get embarrassed as a home favorite (see the first trend below). This first trend is just one of the many reasons why MTi 10-point teasers have done so well season after season.

Also, Packers don't get embarrassed at home after November — over the past TWENTY YEARS. This is just a sampling of THOUSANDS of teaser trends we have available to us with the powerful Sports Data Query Language (SDQL).

| DESCRIPTION | SDQL TEXT |
|--|---|
| The Ravens are 76-0 ATSp10 in franchise history as a home favorite of fewer than 13 points during the regular season as long as they had at least 25:05 of possession time in their last game and it was not an overtime game. | team = Ravens and H and -13 < line < 0 and p:TOP > 1505 and REG and p:overtime=0 |
| The Steelers are 46-0 ATSp10 since October, 1992 after a game in which their completion percentage was at least ten points higher than their season-to-date average. | team=Steelers and (p:COMP*100.0/p:passes) >= (tA(p:COMP)*100.0/tA(p:passes))+10 and 19921001<=date |
| The Titans are 43-0 ATSp10 in franchise history when they are off a win as a favorite in which they had at least 2:10 more possession time than their season-to-date average. | team = Titans and p:WF and p:TOP - tA(p:TOP) >= 130 |
| The Packers are 43-0 ATSp10 since 1994 in regular season games in December and January as a home favorite. | team=Packers and month in [12,1] and HF and playoffs=0 and season>=1994 |
| The 49ers are 42-0 ATSp10 since November 2005 when their opponent's season-to-date average rushing attempts per game is fewer than 25. | team=Fortyniners and oA(rushes)<25 and 20051101<=date |
| The Panthers are 39-0 ATSp10 since November 1998 on the road after a straight up loss at home. | team=Panthers and A and p:HL and date>=19981101 |
| The Jets are 38-0 ATSp10 since 1993 as a dog when facing a team that has allowed an average of fewer than 285 yards of offense per game season-to-date. | team=Jets and D and oA(o:TY)<285 and season>=1993 |
| The Colts are 38-0 ATSp10 since 2003 the week after a win in which their DPS was negative. | team=Colts and p:W and p:dps<0 and NB and season>=2003 |
| The Rams are 37-0 ATSp10 since 1989 vs a non-divisional opponent when they faced divisional opponents in each of their previous two games. | team=Rams and NDIV and p:DIV and pp:DIV and season>=1989 |

We'll close this report with a 10-point teaser SYSTEM that makes a lot of sense to us.

Since the start of the 2004 season, road teams are 39-0 ATSp10 when the line is within three points of pickem and they're off a loss than dropped them to 500 on the season.

This system is what teaser betting is all about — finding a team that will not get blown out — a team that will give an honest effort. Here we have a road team in a game that the linesmakers rate close to a toss up. The team is off a loss that dropped them to 500. No NFL team wants to dip below 500 and this road game clearly presents a win opportunity. The team will play with passion and with caution. Of course, their opponent looks at the game as a win opportunity as well and they will not take risks in a game that could easily be decided by a turnover. These games have tended to finish close to the line and that is what you want when playing a ten-point teaser.

6.0 Conclusions

This report has provided a general introduction to teaser handicapping. The basic philosophy of teaser handicapping is to use games that are likely to fall close to the number. This means using quality, consistent teams. There is no reason whatsoever to use an inconsistent team in a teaser. If you are a good enough handicapper to know whether the team will be up or down, play the side. If they are not going to need an extra six points, why use them in a teaser?? Finally, if you are looking for thoroughly researched teaser plays from PhD scientists, consider purchasing MTi's teaser plays at KillerCappers.com. If they're not perfect, you don't pay.

The PhD scientists at MTi Sports Forecasting will be releasing their SIX-POINT and TEN-POINT NFL Teaser Plays EXCLUSIVELY at KillerCappers.com in 2014. If you purchase them each week, they are guaranteed to be PERFECT or you pay nothing! That is, the money is returned to your debit account.

MTi's teasers can also be purchased as a season package for \$499 in web debit value, see the ad below for more information.

MTi Sports Forecasting 2014 Teaser Season Package. All the 6 and 10-point teasers from the preseason through the playoffs for just \$499 in web debit value. Available NOW at www.killercappers.com.

GOOGLE GROUP FEATURED SYSTEM

The SportsDatabase Google Group is a great resource for SDQL users. Group members can ask questions about the SDQL needed for certain trends and systems, as well as share great SDQL system finds.

This is one such system, an extended version of a post by Tom that was published during the 2011 NFL season. Looking back on previously posted systems, it is possible to cherry pick those with sustained success and this is one of those systems.

Via Tom:

“TURNOVER SHMURNOVERS”:

Calculate a team’s average turnover margin from their last regular season, and their opponents. I attempted to establish before that turnovers, in at least the long run, regress for a number of reasons. New strategies, new personnel, amped up motivation to make up for mistakes, etc.

In the first two weeks of a season, play the team that left a sour taste in the mouths of the public now up against a team that was “lucky” (they had a negative cumulative turnover margin last season).

SDQL: *week<3 and Sum(turnover margin@team and season and playoffs=0)[team and season-1 and playoffs=0] >0 and Sum(o:turnover margin@o:team and season and playoffs=0) [o:team and season-1 and playoffs=0]<0*

After the 2011 season: 153-103-15 ATS (59.8%)

Hint: the quality of this trend improves as you “push” the premise...in other words things like % bets on the team (we can’t currently query that), or the degree to which the team or teams were unlucky or lucky (try grouping eg. >0,1,2,3,4).

Or look at the line plain and simple. How about this: the team is a Dog (“and D”)

SDQL: *week<3 and Sum(turnover margin@team and season and playoffs=0)[team and season-1 and playoffs=0] >0 and Sum(o:turnover margin@o:team and season and playoffs=0) [o:team and season-1 and playoffs=0]<0 and D*

After the 2011 season: 111-65-6 ATS (63.1%)

Killersports.com Commentary:

Play On teams in the first two weeks of the season with a negative turnover margin last season when facing teams that had a positive turnover margin.

This system is a great find by Tom and checks off a number of things we like to see with a system. The biggest of those is that there is an intuitive reason to believe this could be a value play before running the SDQL.

In the first two weeks of the season, bettors are generally going on a team’s performance last season, along with their off-season moves and the general perception of a team. Turnovers are one of the biggest single factors in a team’s performance in a season, yet there is a solid amount of randomness in turnover margin. Even more important for this system, there is very little consistency in turnover margin from year-to-year, and that fluctuation tends to show itself right from the get-go of the season. The fact that the system gets even better on underdogs makes since because those are the teams where there best value is being created.

There is also two more years of data to work with since this system was originally posted. Those Google Group members that have been riding it have gone 18-12 ATS over that time, with underdogs going 13-7 ATS.

The SportsDatabase Google Group is a great resource for all your SDQL needs and to talk directly with SDQL masters, and the best part is it is completely FREE to join and participate.

There are several ways in which the college game differs from pro football in its structure. One of those nuisances is the extra factors that emotion and focus play into the college game. Another is how important each regular season game is to a team. Both of those factors come into play in this study.

In college football, a single loss is a game changer. For all but the smallest handful of teams, a single loss eliminates a team from any national championship hope. Even with this year's implementation of a four-team playoff, the majority of teams will be eliminated with just a single loss. For non-major conference school, one loss ends the dream of true national relevance and a major bowl game.

It stands to reason as the season wears on, the loss of a perfect season stings even more than it would early in the year, and that it will be harder for these 18-22 year olds to recover emotionally to put forth a strong week of practice, and their top effort come gameday.

What we want to look at in this study is how teams perform the week after their first loss, and to separate the

data by how deep into the season that loss occurs. Since Killersports.com is pro sports only, we turn to the NCAA Football database at Sportsdatabase.com.

The SDQL to generate this chart is *p:L and p:losses=0 and wins*. The "p:L" signifies a loss in their most recent game and the "p:losses=0" states that they were undefeated entering that game. The open-ended parameter of "wins" presents the data by how many wins a team already has on the season.

NOTE: While the college football database at SportsDatabase dates back to 1980, the aggregate wins and losses data needed for this system dates back to 2006.

| Wins | ATS | SU | # of Games |
|------|--------------------------|-------------------------|------------|
| 1 | 100-107-6 (-0.10, 48.3%) | 119-102-0 (2.56, 53.8%) | 221 |
| 2 | 75-55-2 (1.88, 57.7%) | 80-54-0 (6.93, 59.7%) | 134 |
| 3 | 27-41-2 (-2.26, 39.7%) | 31-40-0 (0.24, 43.7%) | 71 |
| 4 | 18-26-1 (0.20, 40.9%) | 24-21-0 (4.56, 53.3%) | 45 |
| 5 | 17-19-1 (-1.72, 47.2%) | 20-17-0 (2.16, 54.1%) | 37 |
| 6 | 9-10-0 (-0.82, 47.4%) | 14-5-0 (12.32, 73.7%) | 19 |
| 7 | 6-6-0 (-1.08, 50.0%) | 7-5-0 (6.25, 58.3%) | 12 |
| 8 | 1-10-0 (-9.68, 9.1%) | 8-3-0 (5.64, 72.7%) | 11 |
| 9 | 2-5-0 (-3.29, 28.6%) | 5-2-0 (15.29, 71.4%) | 7 |
| 10 | 5-2-0 (6.36, 71.4%) | 7-0-0 (19.57, 100.0%) | 7 |
| 11 | 1-2-0 (-12.50, 33.3%) | 1-2-0 (-8.33, 33.3%) | 3 |
| 12 | 2-4-0 (-7.17, 33.3%) | 2-4-0 (-2.50, 33.3%) | 6 |

The results clearly show that at almost any point of the season, the game after losing their first game is a hard one for a team. Compiling the results, if a team was 3-0 or better, they have gone just 88-125-4 ATS (41.3%) in their attempted rebound games (SDQL: *p:L and p:losses=0 and wins>=3*). The results have been particularly brutal when things get deep into the season, and true national championship dreams have formed. Teams that were 8-0 or better are just 11-23 ATS (32.4%) coming off that loss (SDQL: *p:L and p:losses=0 and wins>=8*).

is an expert at trend handicapping in college football and it has shown in its selections. The past two seasons, SBB has implement systems like this into its handicapping and has crushed NCAA Football, winning over 57% of its selections and finishing over +\$2500.

SBB is known for its value Saturday NCAA packages and will also have a great NCAA regular season package available for the entire 2014 season.

Picks can be found at www.killercappers.com

Further weeding out this system, a factor that would seem to play a major role in this next game's performance is how much the loss came by — a nailbitter or a blowout. Below is the results of teams that were at least 3-0 the game after a loss, organized by the losing margin (SDQL: $p:L$ and $p:losses=0$ and $wins>=3$ and $p:margin$).

| Previous Margin | ATS | # of Games |
|-----------------|------------------------|------------|
| -1 | 7-5-1 (3.96, 58.3%) | 13 |
| -2 | 2-3-0 (-2.50, 40.0%) | 6 |
| 3 | 12-17-0 (-0.22, 41.4%) | 29 |
| -4 | 6-2-0 (2.25, 75.0%) | 8 |
| -5 | 2-8-0 (-6.85, 20.0%) | 10 |
| -6 | 7-7-0 (-2.07, 50.0%) | 14 |
| -7 | 9-6-0 (-1.87, 60.0%) | 15 |
| -8 | 3-5-0 (-0.12, 37.5%) | 8 |
| -9 | 2-2-0 (-1.38, 50.0%) | 4 |
| -10 | 5-10-0 (-2.80, 33.3%) | 15 |
| -11 | 4-3-0 (1.21, 57.1%) | 7 |
| -12 | 3-2-0 (0.10, 60.0%) | 5 |
| -13 | 3-0-0 (18.17, 100.0%) | 3 |
| -14 | 4-6-0 (0.95, 40.0%) | 10 |
| -15 | 1-1-0 (3.25, 50.0%) | 2 |
| -16 | 0-3-0 (-12.67, 0.0%) | 3 |
| -17 | 4-3-0 (-1.21, 57.1%) | 7 |
| -18 | 0-8-0 (-11.62, 0.0%) | 8 |
| -19 | 2-2-0 (2.38, 50.0%) | 4 |
| -20 | 1-3-0 (-5.50, 25.0%) | 4 |
| -21 | 3-3-1 (4.86, 50.0%) | 7 |
| -22 | 1-1-0 (5.50, 50.0%) | 2 |
| -23 | 0-2-0 (-10.75, 0.0%) | 2 |
| -24 | 1-1-0 (-13.00, 50.0%) | 2 |
| -25 | 1-4-0 (-7.40, 20.0%) | 5 |
| -26 | 1-0-1 (13.00, 100.0%) | 2 |
| -27 | 0-2-0 (-18.00, 0.0%) | 2 |
| -28 | 1-3-1 (-13.00, 25.0%) | 5 |
| -30 | 1-0-0 (4.50, 100.0%) | 1 |
| -31+ | 2-13-0 (-6.73, 13.3%) | 15 |

It is pretty clear that if a undefeated team gets blown out, they are in real trouble the next game. When these 3-0 teams or better lose by 14 or less, they have at least gone a respectable 69-76-1 ATS. They are still more susceptible to outright upsets than you would like, winning outright just 59.9% of the time. However, if the loss came by more than two TDs, the results have been disastrous. These teams are just 19-49-3 ATS (27.9%) and are just 31-40 SU (SDQL: $p:L$ and $p:losses=0$ and $wins>=3$ and $p:margin<-14$). Teams that lost by 31+ are just 2-13 ATS.

Other notes to consider with this system:

- An offensive letdown in these first losses has produced absolutely awful results. Teams that scored less than 10 points in the first loss are just 2-23 ATS ($p:L$ and $p:losses=0$ and $wins>=3$ and $p:points<10$).
- Teams that are not favored in these games by at least three points are 30-56-3 ATS ($p:L$ and $p:losses=0$ and $wins>=3$ and $line>-3$) compared to 58-69-1 ATS if at least a three-point favorite.
- The most frequent scenario for this system is that the team committed two turnovers in the previous loss. That has happened 59 times, with teams going 15-43-1 ATS. the next game ($p:L$ and $p:losses=0$ and $wins>=3$ and $p:turnovers=2$).

Summary:

College football is really the only team sports — college or professional — where a single regular season loss is devastating to a team's overall outlook. That can affect a team's psyche in a negative fashion and you absolutely see that in these next game results.

SportsBook Breakers has two great ways to get NCAA content for a winning football season.

- 1. Purchase its weekly content on Killercappers.com, which includes, guaranteed plays, trends plays, featured systems and other active trends.**
- 2. Subscribe to the Killercappers.com Weekly Newsletter. Each week, this newsletter contains active NCAA systems and trends in addition to its loads of great NFL content.**

12 NCAA TRENDS TO WATCH

These 12 trends and valuable SDQL are just a sampling of what SportsBook Breakers has to offer for NCAA Football. SBB is one of the foremost experts in trend handicapping for college football with its college plays along with NFL selections available at www.killercappers.com each week. You saw the power of its trends and systems the past two seasons, with SBB winning over 57% of its college selections. The 12 trends below include both a description of the trend in the left hand column and the SDQL text used to run the trend in the right hand column. These queries, along with all your college football trends, can be run at SportsDatabase.com as KillerSports.com is pro only.

| DESCRIPTION | SDQL TEXT |
|---|--|
| Oklahoma St. is 15-0-1 ATS (13.0 ppg) since 2007 when between a 5 and 9 point favorite. | <i>team=OKST and season>=2007 and -9<=line<=-5</i> |
| Uconn is 13-0 ATS (9.9 ppg) since October 27, 2001 as a home dog of more than a point, coming off a loss as a dog. | <i>team=CON and H and line>1 and p:DL and date>=20011027</i> |
| Alabama is 12-0 ATS (12.2 ppg) since October 25, 2008 following a game where they failed to cover by between five and 15 points and scored more than a TD. | <i>team=ALA and date>=20081025 and -15<=p:ats margin<=-5 and p:points>7</i> |
| Bowling Green is 11-0 ATS (14.0 ppg) since 2012 in regular season games when they allowed less than 13 points last game. | <i>team=BOWL and po:points<13 and season>=2012 and game type=RS</i> |
| Ohio State is 10-0 ATS (8.8 ppg) since January 2009 as a dog vs. a team which is over .500 on the season. | <i>team=OHST and D and date>=20090101 and o:WP>50</i> |
| California is 0-16 ATS (-13.7 ppg) since 2005 as between a 1.5-point favorite and 5.5-point underdog if they are not on a 3+ game losing streak. | <i>team=CAL and season>=2005 and 5.5>=line>=-1.5 and (p:W or pp:W or ppp:W)</i> |
| Central Michigan is 0-13 ATS (-13.9 ppg) since October 2010 after a game where they were away dogs of less than 20 points. | <i>team=CMCH and p:AD and p:line<20 and date>=20101002</i> |
| Marshall is 0-13 ATS (-13.5 ppg) since October 26, 2002 as a road favorite of less than 30 points after a win as less than a 28-point favorite. | <i>team=MRSB and AF and line>-30 and p:W and p:line>-28 and date>=20021026</i> |
| Penn St. is 0-12-1 ATS (-10.0 ppg) since 2006 as a regular season dog of at least three points coming off a win. | <i>team=PNST and line>=3 and season>=2006 and game type=RS and p:W</i> |
| Hawaii is 0-10 ATS (-12.9 ppg) since December 24, 2010 when the teams combined for between 69 and 110 points in their last game. | <i>team=HAW and 110>=p:points+po:points>=69 and date>=20101224</i> |
| Fresno St. is 12-0 OU (22.2 ppg) since September 30, 2006 in the first 10 games of the season with a total under 71, when they won by less than a FG or lost by less than 10 last game. | <i>team=FRES and date >= 20060930 and -10<p:margin <3 and total < 71 and game number<10</i> |
| Bowling Green is 0-16 OU (-14.9 ppg) since October 15, 2011 when the total is over 47 in the regular season and they have no more than seven days rest. | <i>team = BOWL and game type = RS and rest<=7 and total > 47 and date >= 20111015</i> |

2013 TRENDS ROUND UP

The thing about trends found in this NFL Bible compared to their MLB and NBA counterparts is that there are just not as many opportunities for them to be active during a given season. In those sports, if a trend is not active over an entire 82 or 162 game season, it may not be all that relevant of a trend in the first place. In the NFL, several of the amazing trends you find on the following pages may never be active in 2014, as was the case with last season's book.

However there were several quality trends in the 2013 book that did produce a winner in 2013. Below are some of those spotlight trends from the 2013 NFL Bible.

TREND: The Patriots are 14-0 ATS (+11.1 ppg) since 2003 in the first 16 weeks of the season following a game where they averaged less than 4.15 yards per play.

SDQL: *team=Patriots and season>=2003 and p:YPPPL<4.15 and week<17*

TREND: Tom Brady is 11-0 ATS (+10.7 ppg) since 2004 after a game where he completed less than 50% of his passes.

SDQL: *TBrady:p:completions/TBrady:p:passes<=.5 and season>=2004*

These two trends that both went 3-0 in 2013 are linked here for a couple of reasons. For starters, both were found in the 2013 NFL Bible Bonus Content (see details on the 2014 bonus content below). Also, these trends are somewhat linked, as the Patriots yards per play will inevitably struggle when Tom Brady is not completing a high percentage of passes. In 2013, two of the three wins by both of these came in overlapping games, week three against Tampa Bay and week six against New Orleans. In fact, five of the 11 wins on the Tom Brady trend were also active with the Patriots trend.

TREND: The Panthers are 22-0-1 ATS (+11.3 ppg) since November 8, 2004 when the total is over 37 and they aren't 2 TD+ favorites, when they have at least full rest and aren't

heading into their bye, if their opponent has won less than 40% of its games and it is past week four.

SDQL: *team=Panthers and date>=20041108 and week>4 and o:WP<40 and total>37 and line>-14 and n:week=week+1 and rest>=6*

This trend takes several parameters to get to perfect, but none the less the results were again huge going 3-0 in. The main thrust of the trend is that Carolina has been extremely strong against poor teams past the first few games of the season. In 2013, the Panthers faced Minnesota in week six, Atlanta in week nine and Tampa Bay in week 13, winning each of those games by at least 21 points.

TREND: The Giants are 24-0 ATS (+9.2 ppg) since 1994 when their ATS margin increased in each of their past two games, as long as they were not a FG+ favorite in both games.

SDQL: *team=Giants and A and ppp:ats margin<pp:ats margin<p:ats margin and (p:line>-3 or pp:line>-3) and season>=1994*

At 22-0 ATS heading into the 2013 season, this trend was the largest featured in the 2013 book. It did not disappoint, going 2-0 last season despite a down season from the Giants.

TREND: The Steelers are 0-15 OU (-12.6 ppg) since December 2006 at home when facing a team that has benefited from an average of less than 1.4 turnovers per game season-to-date.

SDQL: *team=Steelers and site=home and oA(o:TO)<1.4 and 20061201<=date*

There were also several successful totals trends in the 2013 Bible including this one that produced three unders last season. Pittsburgh's defense is reliant on big plays to produce big time scoring, and we expect that to be the case again in 2014.

WANT TO GET MORE GREAT TRENDS TO HELP YOU DOMINATE DURING THE 2014 SEASON. DON'T MISS THE BONUS CONTENT AVAILABLE THIS AUGUST. THE 2014 ADDITIONAL CONTENT WILL INCLUDE OVER 100 TRENDS AS WELL AS WRITEUPS AND SYSTEM ANALYSIS.

NFL Team Trends & Stats

This section contains a page of trends for each of the 32 NFL teams and a facing page with a long list of stats for the team from 2004 through 2013. There is also a column which gives the cumulative 2004-2013 results.

There are five play-ON trends, five play-AGAINST trends, one play-UNDER trend and one play-OVER trend. All trends are perfect and all were provided by the researchers at Killersports.com. Professional bettors utilize these and thousands in handicapping each week's games

Both MTi Sports and SportsBook Breakers will have complimentary selections available in the NFL at KillerCappers.com early in the 2014 season using several trends just like these. The complimentary selections will come with exclusive reasoning that was uncovered with the Sports Data Query Language.

The trends provided here are presented in three columns. The first is simply the trend ID. The play-ON trends are numbered 1-5, the play-AGAINST trends are numbered 6-10, the play-OVER trends are all numbered 11 and the play-UNDER trends are all numbered 12. The second column gives a

description of the trend. Included is the search-from date, the average margin by which the team covers or fails to cover the spread and, of course, the record of the trend. If the search-from date is 1989, then the record might be even better than what is published because the database at sports-database.com only goes back to 1989.

The third column gives the SDQL text of the trend. With the SDQL text you can get the complete record of the trend anytime with a query text box. You can check the trend right now, or anytime during the season. Since the database at KillerSports.com is updated daily, the record will be up-to-date.

A sampling of all the trends in this section that are ACTIVE for games being played the upcoming week will be available in the KillerSports.com Weekly NFL Report. The active trend listing will save hours of entering SDQL text to see if a particular trend is active. For subscription information, visit KillerSports.com.

If you have questions or comments about any of the information presented in this section, please feel free to e-mail us at support@KillerSports.com.

ARIZONA CARDINALS

| | | | |
|--------------|--------|--|---|
| PLAY ON | ARZ001 | The Cardinals are 15-0 ATS as a home dog of more than six points when they are off a game as a dog in which they had at least 2.5 times more passing yards than rushing yards. | team=Cardinals and H and line>6 and p:PY/p:RY>=2.5 and p:D |
| | ARZ002 | The Cardinals are 14-0 ATS at home on Sunday with the line is within 3 of pick and they lost and failed to cover their last two games. | team=Cardinals and H and -3<=line<=3 and p:L and pp:L and p:ATSL and pp:ATSL and day=Sunday |
| | ARZ003 | The Cardinals are 12-0 ATS after a road game in which no player had double-digit rushing attempts, winning every game straight up. | team=Cardinals and max:p:rushes<10 and p:A and date>=20051101 |
| | ARZ004 | The Cardinals are 10-0 ATS as a 7+ dog when on exactly a 2 game SU and ATS losing streak. | team=Cardinals and line>=7 and streak=-2 and ats streak=-2 |
| | ARZ005 | The Cardinals are 7-0 ATS as a dog after scoring a defensive touchdown on the road. | team=Cardinals and D and p:DTD>0 and p:A and date>=20020101 |
| PLAY AGAINST | ARZ006 | The Cardinals are 0-10 ATS as a favorite when they won and covered their last two games. | team=Cardinals and F and p:W and pp:W and p:ATSW and pp:ATSW |
| | ARZ007 | The Cardinals are 0-10 ATS as a road dog by more than a field goal when they are off a 21-plus point loss. | team=Cardinals and A and line>3 and p:margin<=-21 and date>=20000101 |
| | ARZ008 | The Cardinals are 0-9 ATS when visiting a team that has allowed less than 3.75 yards per carry season-to-date and they are not getting more than a field goal. | team=Cardinals and A and line<=3 and oA(o:YPRA)<3.75 and season>=1995 |
| | ARZ009 | The Cardinals are 0-9 ATS on the road when they are off a game in which they rushed for 150-plus yards and lost fewer than two fumbles. | team=Cardinals and A and p:RY>=150 and p:FUML<2 and season>=2002 |
| | ARZ010 | The Cardinals are 0-8 ATS as a home favorite after scoring a defensive touchdown | team=Cardinals and HF and p:DTD>0 |
| PLAY OVER | ARZ011 | The Cardinals are 17-0 OU as a dog the week following a game in which they suffered a two-plus turnover margin and had fewer than 24 first downs. | team=Cardinals and D and p:TOM>=2 and NB and p:FD<24 and date>=20041201 |
| PLAY UNDER | ARZ012 | The Cardinals are 0-15 OU when the line is within three of pick and they allowed more than 296 yards passing in their last game. | team=Cardinals and -3<=line<=3 and po:PY>296 |
