SportsBook Breakers and Killersports.com are teaming up again to produce the 2016 MLB Daily Information Sheet. This two-page sheet is your first place to start each morning for your baseball gambling information. The sheet will include a straight up, over/under, and starter trends of the day (with the valuable SDQL text included), a daily schedule chart, and other valuable handicapping information for that day's games. For an example of the daily newsletter, see pg.52.

You can get all this for the low, low price of FREE! That is not a misprint as SportsBook Breakers and Killersports.com have collaborated to provide this invaluable information for you free of charge. Why pay hundreds of dollars a year on other sites for newsletters that don't provide the hard hitting and relevant information that Killersports.com can get you every single day?

When you sign up at Killersports.com (or go to Edit Profile and Subscriptions for those already members) all you have to do is click the "E-mail me the free KillerSports.com Newsletters" to get this newsletter delivered free to your inbox every morning.

TRENDS MART

KillerSports.com is excited to announce the opening of the first peer-to-peer trend market. Here you can buy profitable trends and systems from SDQL masters and pros, several of whom use these SDQL-based trends and systems as a key component to successful betting and handicapping.

Visit the Trends Mart at www.killersports.com/trend_mart to get started

To learn how to purchase and access trends and systems from the Trends Mart, watch this instructional video sdqlconsultancy.com/2015/02/08/how-to-purchase-active-trend-sets-at-the-sdql-trend-mart/

INTRODUCTION

The 2016 MLB Handicapping Bible contains information that any bettor can use to become a confident, informed and successful gambler while tackling the 2016 season. There are trend sets, isolated trends and perhaps most importantly, articles on interesting betting subjects. This information alone might not make you a great bettor, but the content of this book is a great starting point for a successful 2016 season.

The main trend set includes six trends in past performance for each team. There are six play-on or play-against W-L trends for each team (TEAM001-006), six run line trends for each team (TEAM007-012) and six over/under trends for each team (TEAM013-018).

ALL of the trends come with the Sports Data Query Language (SDQL) that generates the trend. With the SDQL text, you can verify the accuracy of the trend, but more importantly you can see how the trend is performing anytime during the season. To check any trend, type (or paste) the SDQL text into the query text box at:

<http://killersports.com/mlb.py/query>

and then simply click on the query button. The results should appear in a second or two.

If you have any questions about the SDQL, post them at the Google Group for the SDQL at:

<http://groups.google.com/group/SportsDataBase>

The group has many expert members, including the genius behind the Sports Data Query Language, Joe Meyer. Feel free to post any questions/comments about this publication there as well.

For the self-starters, check out the one-page basics on how to use the SDQL on pg. 5. If you are looking for more information, check out this baseball specific manual on the SDQL:

http://killersports.com/Download/MLB/query_manual.pdf

If you are looking for a more concise guide to the subtle complexities of SDQL covering all sports, visit the guide at:

<http://www.sdql.com/intro.html>

We have no doubt that you will quickly become hooked on the SDQL at Killersports.com and the quality information that all the quality handicappers at

Killercappers.com can provide with it.

There are also a couple of great ways to track the trends found in this book. The first is to save these trends (or ones you discover on your own) at Killersports.com. To do this you need to be logged in as a member. After performing a query (from the NBA or the MLB or the NFL query page), you will see a save to personal trends hyper link above the query text input box.

Clicking on this save to personal trends link will bring you to a page where you can type in a description of the trend. Along with a description, many like to type in the record of the trend here in order to track the performance throughout the season.

After entering a description clicking on the SAVE button saves your trend. When one of your trends is active, you will see a hyperlink to the game listing and your descriptive text on the My Trends page.

Currently, you are allowed two free trends, after which each trend costs two dollars per season.

For the trends found in this book, an even easier option exists... LET US TELL YOU! Each day, SportsBook Breakers will publish the KillerSports.com 2016 MLB Newsletter. This two-page sheet will be your first stop each morning for up-to-the-minute baseball handicapping information.

When you sign up at Killersports.com (or go to Edit Profile and Subscriptions for those already members) all you have to do is select "E-mail me the free KillerSports.com Newsletters" to get this newsletter delivered every morning.

Finally, you can also purchase trends and systems directly from SDQL experts at the Killersports.com Trends Mart. SDQL Masters and Pros will have active trends and systems available for purchase in daily and weekly packages to give you an inside edge on the MLB information you need to know.

http://www.killersports.com/trend_mart

We would like to thank MTi Sports, SportsBook Breakers and the Sports Data Query Group for their contributions to this book and hope you enjoy the content and find it a useful start to the baseball season. Join us all season long and let's make this a successful 2016 campaign.

SDQL INTRODUCTION

SDQL stands for Sports Data Query Language. It is a language that allows the investigation of past sports results over the internet using your home computer. It is easy. It is fast and it is free. If you can perform a search on Google, you can query the past results of professional sports games.

Like the Google search, there is a text query box in which you enter what you would like to search. Unlike Google, the search has to be specific and you must use the Sports Data Query Language. The advantage of the SDQL is that you get exactly what you ask for.

For example, if you want to see all the no-hitters in major league baseball since 2004 simply enter:

```
hits=0
```

query

into the query text box and then click on the query button. It is as simple as that! There are SDQL query text boxes at many internet sites. The most developed is currently at:

<http://killersports.com/mlb.py/query>

To see all the MLB games in which a team scored at least 10 runs without hitting a home run, use:

```
HR=0 and runs>=10
```

query

That's it!

The SDQL allows access to billions of situations that are of interest to sports historians, the sports media, fantasy league participants and serious sports bettors.

An ability to quickly and efficiently interrogate historical data in Major League Baseball (as well as the NBA and NFL) will provide the SDQL user a terrific advantage over those that just pore over box scores and read other people's interpretations of the results.

Perhaps the best way to grasp the SDQL is to simply try the hundreds of examples in this book. That said, there are only a couple of key ideas that will get you well on your way to becoming an SDQL master.

The first is that a query consists on a number of conditions separated by the word "and." The second is grasping the difference between the team and the opponent. In sports, there are two combatants. To distinguish between them, SDQL calls one of these the team and the other the opponent. This allows access to results based on both the performance of the team and the performance of

their opponent. For example, we can see how a team performs when they score at least five runs and we can see how a team performs when their opponent scores at least five runs.

For example, to see how the Giants perform in games in which they scored at least five runs, use:

```
team = Giants and runs >= 5
```

query

When this query is run, the computer responds with a records summary and a game listing of all the games since 2004 in which the Giants scored at least five runs.

Since there is no game reference on the parameter 'runs' it refers to the team and the game in question. To see how the Giants perform in games in which their opponent scored at least five runs, use:

```
team = Giants and o:runs >= 5
```

query

The o: prefix on the "runs" points the runs parameter to the opponent.

To see how the Giants perform in games AFTER they scored at least five runs, use:

```
team = Giants and p:runs >= 5
```

query

Here, the p: prefix on the "runs" points the runs parameter to the team's previous game.

Each one of these queries has two SDQL phrases. The first defines the team and the second gives a condition. There is no limit to the number of SDQL phrases that can be strung together with the word "and."

That's it. This is the basic structure of the SDQL. This structure will allow the thorough interrogation and investigation of historical sports data. Understanding this structure is the key to understanding the SDQL. Once you have a grasp of this structure, you will be able to perform your own investigations.

Start by trying the many examples in this book. If you have any questions about the SDQL, address them to the sportsdatabase.com discussion group at:

<http://groups.google.com/group/SportsDataBase>

This group is monitored by numerous SDQL masters who will be able to answer all your questions.

Bullpen Usage and Bad Starters

In baseball, rest generally is not a huge factor because for the most part, teams are playing every day. In the NBA and NHL where teams play a grueling game and then are asked to play teams the next game with various amounts of rest, including with no rest against a team that is rested, this rest factor can wildly swing certain games. It is also for the most part factored into lines on a consistent basis in those sports. In football, rest is most noticeable when it comes to bye weeks, or teams playing on a short week.

One spot where rest may play a factor into a game even when both teams are playing without a day off is the rest of a bullpen. Using data spanning back to the beginning of the MLB database at Killersports.com in 2004, running a few simple SDQL query we can easily investigate how a bullpen's rest might impact the next result. As the starting point for this investigation we will use the SDQL *p:PU and rest=0*. The prefix *p* signifies a team's previous game while *PU* is a shortcut for the amount of pitchers used. Before getting into the actual results depending on how many pitchers were used last game, we are curious if the amount of pitchers used is factored into the line before a

game starts. The average line when teams used one or two pitchers last game is -107.8. The average line when a team used six or more pitchers last game is -107.1. These are virtually the same, particularly when considering that the average discrepancy between teams that won (-111..7) and lost (-100.9) their last game is far greater.

Now using the open-ended SDQL of *rest=0 and p:PU*, we can create a chart to look at the results based on how many pitchers were used yesterday.

Previous Pitchers Used	Record	Play On \$	Play Against \$
1	756-732 (0.13, 50.8%)	-\$4,464	-\$3,002
2	2675-2591 (0.05, 50.8%)	-\$4,694	-\$22,843
3	6793-6890 (-0.01, 49.6%)	-\$43,362	-\$27,091
4	7570-7717 (-0.01, 49.5%)	-\$52,526	-\$25,415
5	4855-4784 (-0.04, 50.4%)	-\$15,037	-\$33,120
6	1914-1955 (-0.04, 49.5%)	-\$15,141	-\$4,365
7+	891-875 (0.01, 50.5%)	-\$3,316	-\$5,472

From this chart, we can see pretty clearly that there is no value to be had looking at this factor by itself. But that does not mean that there is not still relevance, as for instance obviously not every situation where a team used six pitchers last game is the same. And that part the beauty of the SDQL, allowing multiple parameters to easily be strung together using *and*.

The factor that we feel is most relevant to add to this situation is the quality of this game's starter. It could be easier for a bad starter to be hidden by a rested bullpen or conversely it may be easier for a lights out starter to pick up a team that dug deep into the bullpen yesterday, keeping in mind how bettors are viewing good and bad starters with lines regardless of the bullpen situations.

We'll start by looking at how good starters perform relative to expectations and depending on the previous day's bullpen usage. We are defining these top starters as having an ERA of under 3.00 on the season, using the SDQL shortcut *STDSERA<3*, which stands for season to date starter earned run average. The results with starters with an ERA under 3.00 are below.

SPORTSBOOK BREAKERS

SportsBook Breakers is coming off a fantastic season handicapping baseball in 2015. SBB finished up over \$1400 for the season for the \$100 player. That was the second-best handicapper in the country tracked by VegasInsider.com.

We are excited to announce that SportsBook Breakers will continue the best handicapping deal in the business this season. You can get a 7-day package of all SportsBook Breakers pick for just \$50 in web debit value. That's just \$7 a day!!! You can also get SBB's season package for even bigger savings.

Available exclusively at www.killercappers.com.

Previous Pitchers Used	Record	Play On \$	Play Against \$
1	171-149 (0.47, 53.4%)	-\$769	-\$738
2	572-530 (0.21, 51.9%)	-\$5,418	-\$544
3	1541-1430 (0.14, 51.9%)	-\$16,602	\$972
4	1733-1635 (0.18, 51.5%)	-\$21,110	\$3,955
5	1147-1029 (0.14, 52.7%)	-\$6,396	-\$4,456
6	475-391 (0.45, 54.8%)	\$2,575	-\$6,856
7	138-124 (0.32, 52.7%)	-\$724	-\$599
8+	62-43 (0.62, 59.0%)	\$604	-\$1,074

While these starters have been slightly profitable playing against in games where they are not trying to pick up the bullpen (0.4% playing against with four pitchers or less), this is still not a particularly significant result compared to how these starters perform overall (-0.7% playing against).

Perhaps we will have more luck looking at pitchers on the other end of the spectrum. Now we want to look at how pitchers who have not performed very well on the season have done depending on how many pitchers were used the previous game. We are defining these as starters with an ERA of over 5.00 and will use the SDQL of *STDSERA>5 and p:PU*. The results are below.

Previous Pitchers Used	Record	Play On \$	Play Against \$
1	164-161 (-0.06, 50.5%)	\$1367	-\$3148
2	547-599 (-0.11, 47.7%)	-\$314	-\$5687
3	1416-1530 (-0.28, 48.1%)	\$4128	-\$19890

4	1503-1778 (-0.34, 45.8%)	-\$10774	-\$7031
5	955-1075 (-0.28, 47.0%)	-\$2258	-\$8627
6	371-458 (-0.63, 44.8%)	-\$5347	\$1228
7+	151-210 (-0.74, 41.8%)	-\$4,391	\$2,555

These results show both a pattern that makes sense in following a narrative and one that provides a couple of betting opportunities. As you might expect, these poor starters have performed the best when there is a rested bullpen backing them up. This allows managers to have a quicker hook in these games at the first signs of trouble and to give more innings to what are generally higher quality bullpen pitchers. When a team used three or fewer pitchers yesterday (SDQL: *p:PU<=3 and rest = 0 and STDSERA > 5*), these starters with an ERA over 5.00 are 2128-2294 (-0.22, 48.1%). Because they are underdogs of an average of +113.4 in these spots, they are +1.0% ROI playing on. When a team used just a single pitcher the entire way last game, pitchers are +3.7% ROI playing on.

On the other side, these pitchers have a ton of trouble when trying to pick up a bullpen that was taxed yesterday. The manager is forced to try to stretch these shaky starters and things do not go well. When a team used six or more pitchers yesterday and have a starter with an ERA over 5.00 going, they are just 522-668 (-0.67, 43.9%). Even with the average line of +114.8 in these spots, the teams are +2.3 ROI playing against.

What we're learned here is that quality starting pitchers are just not that reliant on their bullpen, and as such a bullpen's rest does not mean much to their bottom line. However, bad starters really need a bullpen to get their teams through the middle and late innings, making bullpen rest a major factor in their performance.

SportsBook Breakers systems on the Killersports.com Trend Mart

These MLB systems are just two of hundreds of MLB systems SportsBook Breakers uses when handicapping on Killercappers.com each day. Now with the Killersports.com Trends Mart, you can get weekly access to SBB's winning systems, as well as those of other SDQL masters and pros.

Purchase access to SBB's complete database of active systems daily or weekly at killersports.com/trend_mart

FEATURED TREND: RYAN HOWARD

Trend in Past Performance: **SDQL Text**

Ryan Howard off 2-plus RBI *A and line >=160 and Phillies:Ryan Howard:p:rbi >= 2 and p:margin>=-2 and date>=20070722*

The Phillies are 12-0 SU as a 160-plus road underdog after a game in which Ryan Howard had multiple RBIs and they did not lose by multiple runs.

Trend Analysis

Ryan James Howard is nearly the end of a long and successful career. Although he has played poorly over the past few years, there is one spot in which the Phillies have been hugely profitable -- as a big dog after a game in which Ryan Howard had multiple RBAs. The Phillies are a ridiculous 12-0 as a 160-plus underdog after a game in which Howard had multiple RBIs, as long as they did not lose that game by multiple runs. The complete game listing and stats summary appears below.

There were five active dates in 2014 and three last season. The Phillies have actually been crushing their opponent in this spot,

winning by an average of 3.83 runs per game. In 2015, they beat the Yankees, Cubs and Blue Jays in this spot, with two of the three wins as a 200-plus dog.

It is interesting to consider possible reasons for this trend in performance. Certainly, it is not unreasonable to think that the entire team gets down on itself when its veteran leader is not producing. Conversely, when he does have a solid performance, it can lift up the entire squad. Even the pitching staff is positively influenced, as they take the hill with the hope of actually getting some run support.

In these twelve games, the Phillies have allowed an average of 2.7 runs and seven of the starters produced quality starts.

When this one is active in 2016, it is not a certainty that the Phillies will be a good investment, but it is probably not a good idea to play against them.

SU: 12-0 (3.83, 100.0%) avg line: 181.8 / -200.4
 RL: 12-0 (5.33, 100.0%) avg line: -122.9 / 111.9
 OU: 5-7-0 (1.17, 41.7%) avg total: 8.0

FEATURED TREND: COLE HAMELS

Trend in Past Performance: **SDQL Text**

Cole Hamels vs Hot Starter *starter=Cole Hamels and os:W and oss:W and osss:W and line >= -105 and date >= 20130700*

Cole Hamels is 9-0 when he is not favored and facing a starter who produced team wins in four straight starts.

Trend Analysis

On July 31st, 2015, Cole Hamels was traded to the Texas Rangers. His last start with the Phillies was a no-hitter, thus he became the first player in major-league history to pitch a no-hitter in his final start with a team before being traded.

Hamels seems to save his best for an opposing pitcher that is doing well -- especially when he is not expected to win. Since July of 2013, Hamels' teams are a combined 9-0 when the opposing starter has produced four straight wins and Hamels is not favored.

Hamels has produced a quality start every time under these conditions, allowing an average of 1.78 runs in an average of seven and a third innings.

In his last four starts in this spot, he allowed a total of four earned runs.

Last season he was in this spot twice. In the first, he beat a streaking Jake Arrieta and the Cubs 5-0 as a 180 dog allowing NO hits while striking out 13. The second qualifying

start was game two of their playoff series vs Toronto last season against Marcus Stroman. The Blue Jays had won Stroman's last five starts, outscoring their opponent by a combined 25-3 in his last three starts. The linesmakers made the Jays a 180 favorite, but Hamels went seven innings and allowed two earned runs and Rangers won it 6-4 in extras.

Hamels is not the only starter that is at his best in this spot. Phil Hughes, of the Minnesota Twins is 8-1 his last nine in exactly this spot. In his last three, the Twins won 4-1, 4-1 and 4-2.

Chris Tillman also seems to get up in this spot. He is 9-3 in this spot in his career. In his only start in this spot last season, he was a 130 dog vs David Price in Detroit. He shut out the Tigers 3-0 allowing one hit in eight innings of work.

In the "pitchers to avoid" category, we find Edwin Jackson, who is 0-9 in this spot in his career with five different teams, losing by an average of 4.56 runs per game.

This is yet another situation to watch for in 2016. The Sports Data Query Group will certainly have their eyes on it.

SU: 9-0 (2.11, 100.0%) avg line: 132.1 / -143.2

50 SU STARTER TRENDS

Baseball is unique compared to other sports in that there is no individual player who impacts the game as much as a starting pitcher does in baseball. Thankfully, the SDQL accounts for this and allows for queries specific to individual starters. To accomplish this, a starter query should begin with the SDQL text *starter=player name*. From there you can use any parameter as you would in a team-based trend but there are also two prefixes that can be particularly useful in these situations, *s* and *S*, which refer back to the starter's last outing, and the starter's last outing against an opponent respectively. Below are 50 straight up starter trends featuring some of the top pitchers in the game and situations where they have consistently failed or succeeded.

TREND ID	TREND DESCRIPTIONS	SDQL TEXT
STR001	Jake Arrieta has produced a team record of 15-0 SU coming off two straight quality starts.	<i>starter=Jake Arrieta and s:QS and ss:QS and date>=20150730</i>
STR002	Homer Bailey has produced a team record of 0-9 SU as a 130+ favorite coming off a start where he worked at least eight innings on the road.	<i>starter=Homer Bailey and line<=-130 and s:SIP>=8 and s:A and date>=20110808</i>
STR003	Clay Buchholz has produced a team record of 0-10 SU at home coming off a start where he pitched less than seven innings.	<i>starter= Clay Buchholz and H and s:SIP<7 and date>=20140421</i>
STR004	Madison Bumgarner has produced a team record of 8-0 SU as a favorite facing an opposite starter with an ERA of at least 5.00.	<i>starter=Madison Bumgarner and F and o:STDSERA>=5 and date>=20140622</i>
STR005	Carlos Carrasco has produced a team record of 0-12 SU as an underdog coming off a start where he threw less than 98 pitches.	<i>starter= Carlos Carrasco and D and s:SPT<98 and date>=20090908</i>
STR006	Andrew Cashner has produced a team record of 0-7 SU at home after a start where he did not walk a batter.	<i>starter=Andrew Cashner and H and s:SWA=0 and date>=20120914</i>
STR007	Alex Cobb has produced a team record of 0-7 SU coming off a start where he walked at least four batters.	<i>starter=Alex Cobb and s:SWA>=4 and date>=20120530</i>
STR008	Gerrit Cole has produced a team record of 10-0 SU coming off a start where he went no longer than five innings.	<i>starter= Gerrit Cole and s:SIP<=5 and date>=20130723</i>
STR009	Bartolo Colon has produced a team record of 16-0 SU as a road favorite coming off a start where he pitched at least six and two thirds innings.	<i>starter= Bartolo Colon and AF and s:SIP>6.5 and date>=20050813</i>
STR010	Johnny Cueto has produced a team record of 11-0 SU at home coming off a start where he went at least eight innings.	<i>starter= Johnny Cueto and H and s:SIP>=8 and date>=20120818</i>

TREND ID	TREND DESCRIPTIONS	SDQL TEXT
STR011	Jorge De La Rosa has produced a team record of 12-0 SU as a 150+ favorite coming off two straight quality starts.	<i>starter= Jorge De La Rosa and line<=-150 and s:QS and ss:QS and date>=20080901</i>
STR012	R.A. Dickey has produced a team record of 9-0 SU as a favorite when his team used no more than two pitchers last game.	<i>starter=RA Dickey and F and p:PU<=2 and date>=20040607</i>
STR013	Jose Fernandez has produced a team record of 12-0 SU at home coming off two straight quality starts.	<i>starter=Jose Fernandez and H and s:QS and ss:QS and date>=20130614</i>
STR014	Doug Fister has produced a team record of 10-0 SU as a favorite coming off a start where he did not walk a batter.	<i>starter=Doug Fister and F and s:SWA=0 and date>=20120927</i>
STR015	Yovani Gallardo has produced a team record of 12-0 SU as a favorite after a start where he threw at least 114 pitches and more than six innings.	<i>starter= Yovani Gallardo and F and s:SPT>=114 and s:SIP>6 and date>=20090730</i>
STR016	Gio Gonzalez has produced a team record of 7-0 SU as a favorite of -120 or more when his teams starter did not go more than five innings in their last game.	<i>starter= Gio Gonzalez and line<=-120 and p:SIP<=5 and date>=20140618</i>
STR017	Collin McHugh has produced a team record of 12-0 SU coming off a start where he did not allow a walk.	<i>starter=Collin McHugh and s:SWA=0 and date>=20140427</i>
STR018	Corey Kluber has produced a team record of 9-0 SU at home coming off a start with at least 10 strikeouts.	<i>starter=Corey Kluber and H and s:SSO>=10 and date>=20130712</i>
STR019	Zach Greinke has produced a team record of 20-0 SU as a 150+ favorite coming off a home start where he went no more than six and one-third innings.	<i>starter=Zack Greinke and line<=-150 and s:SIP<=6.4 and s:H and date>=20080902</i>
STR020	Cole Hamels has produced a team record of 9-0 SU at home when his team used at least five pitchers last game.	<i>starter= Cole Hamels and H and p:pitchers used>=5 and date>=20150508</i>
STR021	Jason Hammel has produced a team record of 7-0 SU as a home dog of more than +100 after a road start where he pitched no more than six innings.	<i>starter= Jason Hammel and H and line>100 and s:SIP<=6 and s:A and date>=20070908</i>
STR022	Matt Harvey has produced a team record of 0-9 SU if they are dogs of -101 or more when facing an opposing starter with an ERA under 4.00.	<i>starter= Matt Harvey and line>=-101 and o:STDSERA<4 and date>=20130613</i>
STR023	Felix Hernandez has produced a team record of 13-0 SU as a 125+ favorite after allowing at least seven hits in his last start.	<i>starter=Felix Hernandez and line<=-125 and s:SHA>=7 and date>=20140512</i>
STR024	Phil Hughes has produced a team record of 16-0 SU at home when he won his last start and is facing an opposing starter with an ERA of at least 4.30.	<i>starter= Phil Hughes and H and o:STDSERA>=4.30 and s:W and date>=20090520</i>
STR025	Ubaldo Jimenez has produced a team record of 0-11 SU on the road when his team is on a losing streak of at least two games and they also lost in his last start.	<i>starter=Ubaldo Jimenez and A and streak<=-2 and s:L and date>=20120804</i>

TREND ID	TREND DESCRIPTIONS	SDQL TEXT
STR026	Scott Kazmir has produced a team record of 0-15 SU as an underdog coming off a start where he had no more than five strikeouts.	<i>starter= Scott Kazmir and D and s:SSO<=5 and date>=20100925</i>
STR027	Ian Kennedy has produced a team record of 10-0 SU when his team won his last start and he pitched more than seven innings.	<i>starter= Ian Kennedy and s:SIP>7 and s:W and date>=20110616</i>
STR028	Clayton Kershaw has produced a team record of 8-0 SU coming off a start with at least 10 strikeouts.	<i>starter=Clayton Kershaw) and s:SSO>=10 and date>=20150718</i>
STR029	Dallas Keuchel has produced a team record of 10-0 SU as a home favorite after his team used at least five pitchers last game.	<i>starter=Dallas Keuchel and HF and p:PU>=5 and date>=20140920</i>
STR030	John Lackey has produced a team record of 15-0 SU at home after a start where he threw less than 92 pitches.	<i>starter= John Lackey and H and s:SPT<92 and date>=20130428</i>
STR031	Francisco Liriano has produced a team record of 10-0 SU as a favorite when his team is on a winning streak of at least two games.	<i>starter= Francisco Liriano and F and streak>=2 and date>=20150524</i>
STR032	Wade Miley has produced a team record of 0-8 SU coming off a win in his last start where he did not walk a batter.	<i>starter= Wade Miley and s:SWA=0 and s:W and date>=20120926</i>
STR033	Shelby Miller has produced a team record of 0-9 SU after a home start where he allowed at least seven hits.	<i>starter= Shelby Miller and s:SHA>=7 and s:H and date>=20140624</i>
STR034	Jake Peavy has produced a team record of 21-0 SU as a home favorite coming of a start were his team won and he allowed no more than three hits.	<i>starter= Jake Peavy and HF and s:SHA<=3 and s:W and date>=20040926</i>
STR035	Michael Pineda has produced a team record of 0-12 SU on the road when his team is on a losing streak of at least two games.	<i>starter= Michael Pineda and A and streak<=-2 and date>=20110510</i>
STR036	David Price has produced a team record of 13-0 SU as a road favorite coming off a loss where he allowed at least seven hits.	<i>starter=David Price and AF and s:SHA>=7 and s:L and date>=20100724</i>
STR037	Jose Quintana has produced a team record of 0-8 SU as a 125+ dog coming off a start where he went no more than five innings.	<i>starter= Jose Quintana and line>=125 and s:SIP<=5 and date>=20120719</i>
STR038	Chris Sale has produced a team record of 0-9 SU when his team is on a losing streak of at least four games.	<i>starter= Chris Sale and streak<=-4 and date>=20130413</i>
STR039	Ervin Santana has produced a team record of 0-14 SU if not an underdog of 110+ when coming of a loss in his last start where he allowed at least seven hits.	<i>starter= Ervin Santana and line<110 and s:SHA>=7 and s:L and date>=20110911</i>
STR040	Jeff Samardzija has produced a team record of 0-9 SU at home when he is favored by more than -100 and facing an opposing starter with an ERA under 3.30.	<i>starter= Jeff Samardzija and H and line<=-100 and o:STDSERA<3.30 and date>=20140418</i>

TREND ID	TREND DESCRIPTIONS	SDQL TEXT
STR041	Anibal Sanchez has produced a team record of 9-0 SU as a favorite when his team used at least five pitchers last game.	<i>starter= Anibal Sanchez and F and p:PU>=5 and date>=20140523</i>
STR042	Max Scherzer has produced a team record of 12-0 SU as a road favorite when his team used at least five pitchers last game.	<i>starter=Max Scherzer and AF and p:PU>=5 and date>=20130521</i>
STR043	James Shields has produced a team record of 0-9 SU at home coming off a start where he allowed at least seven hits.	<i>starter=James Shields and H and s:SHA>=7 and date>=20140620</i>
STR044	Noah Syndergaard has produced a team record of 10-0 SU as a 125+ favorite when he did not go more than seven innings last start.	<i>starter= Noah Syndergaard and line<-125 and s:SIP<=7 and date>=20150517</i>
STR045	Masahiro Tanaka has produced a team record of 11-0 SU as a favorite after his team used at least five pitchers last game.	<i>starter= Masahiro Tanaka and F and p:PU>=5 and date>=20140427</i>
STR046	Julio Teheran has produced a team record of 10-0 SU as a home favorite when his team is on a winning streak of at least two games.	<i>starter= Julio Teheran and HF and streak>=2 and date>=20130520</i>
STR047	Adam Wainwright has produced a team record of 15-0 SU as a -130+ favorite facing an opposing starter with an ERA under 3.15.	<i>starter= Adam Wainwright and line<=-130 and o:STDSERA<3.15 and date>=20130511</i>
STR048	Yordano Ventura has produced a team record of 12-0 SU at home after a start where he allowed at least six hits.	<i>starter= Yordano Ventura and H and s:SHA>=6 and date>=20140725</i>
STR049	Justin Verlander has produced a team record of 0-11 SU when not more than a +110 underdog coming off a start where he allowed no more than three hits.	<i>starter= Justin Verlander and line<=110 and s:SHA<=3 and date>=20121024</i>
STR050	Jered Weaver has produced a team record of 0-12 SU as a road underdog of at least +120 when facing a starting pitcher with an ERA under 3.00.	<i>starter= Jered Weaver and A and line>=120 and o:STDSERA<3 and date>=20080815</i>

SPORTSBOOK BREAKERS

SportsBook Breakers is coming off a fantastic season handicapping baseball in 2015. SBB finished up over \$1400 for the season for the \$100 player. That was the second-best handicapper in the country tracked by VegasInsider.com.

SportsBook Breakers will be offering daily, weekly, and season-long packages throughout the 2016 season. These packages are available exclusively at www.killercappers.com.

MLB DATA PLOT

Runs vs Hits in 2015

The plot shows each team's average runs per game vs their average hits per game for the 2015 MLB season. The vertical axis is runs and the horizontal axis is hits. So, reading from left to right gives a ranking of the league in hits per game. Here we find the Cubs and Padres at the bottom and the Tigers at the top.

Similarly, reading from top to bottom gives the ranking of the league in runs per game. Here we find the Braves at the bottom and the Blue Jays at the top.

The dashed line represents a fit of the expected number of runs per hit. Teams above this line were efficient run-producers and teams below the line were inefficient run producers. The shaded area represents "normal" results. Teams outside this area had unusual results. The four teams that were above the normal range were the Astros, Yankees, Rangers and Blue Jays. The four teams that were below the normal range were the Braves, White Sox, Marlins and Tigers.

The most striking is the position of the Toronto Blue Jays. They were by far the best run producers in 2015, but were out-hit by six other teams. To quote a specific example, the Blue Jays averaged 5.45 runs per game on 9.06 hits whereas the Tigers averaged only 4.28 runs on 9.40 hits per game.

Another interesting comparison is the Twins and the Tigers. As mentioned just above, the Tigers averaged 4.28 runs on 9.40 hits per game, but the Twins averaged 4.3 runs per game on only 8.33 hits per game. Put another way, the Twins were 25th of 30 teams in hits per game last season, but they averaged more runs per game than the Tigers who led the league in hits per game.

We should also mention the Braves' performance in 2015. They were dead last in runs scored, at only 3.54 per game, but they averaged more hits per game than seven other teams, including FOUR playoff teams (Mets, Astros, Cubs and Dodgers).

The reasons for the extremes in performance can be split into two types; random fluctuations and assignable cause. Random fluctuations simply include luck. For example, lining into double plays, bloop doubles with two outs that score two runs and many others. Assignable cause includes the team's ability to draw walks, steal bases and, most importantly, hit home runs. The degree to which each of these two factors contributes will vary from team to team. However, it is probably safe to say that we expect the Blue Jays and the Braves to be closer to the normal line in 2016 than they were in 2015.

MLB DATA PLOT

Runs v Hits for MLB teams in 2015
the Blue Jays were efficient

Runs Allowed vs Hits Allowed in 2015

The plot shows each team's average runs allowed per game vs their average hits allowed per game for the 2015 MLB season. The vertical axis is runs allowed and the horizontal axis is hits allowed. So, reading from left to right gives a ranking of the league in hits allowed per game. Here we find that the Cubs allowed the fewest hits per game in 2015 and the Phillies allowed the most hits per game in 2015.

In a similar fashion, reading from top to bottom gives the ranking of the league in runs per game. Here we find that the Colorado Rockies allowed the most runs per game in 2015 and that the St Louis Cardinal allowed the fewest.

The upwardly curving dashed line represents a fit of the expected relationship between the number of runs allowed and the number of hits allowed. Teams above this line were inefficient run-preventers and teams below the line were efficient run preventers. The shaded area represents "normal" results. Teams outside this area had unusual results. The lone team that allowed many more runs than expected -- based on the number of hits they allowed was the San Diego Padres. Only eight teams allowed more runs per game than the Padres in 2015, but the Padres allowed fewer hits than 17 teams.

The most striking position of any team in the league is that of St Louis Cardinals. The Cardinals allowed an average of only 3.27 runs per game in 2015 and the Pittsburgh Pirates were a distance second at 3.68 runs per game. This is the biggest margin between first and second in runs allowed in the history of the database at sportsdatabase.com. However, there were seven teams that allowed fewer hits than the Cardinals. These results are consistent with a pitching staff that is much more effective with men on base.

Another team with an interesting position is that of the Minnesota Twins. They allowed the third-most hits in the league, but allowed fewer runs than thirteen other teams.

The San Diego Padres have the opposite performance. They allowed fewer hits than 17 other teams, but allowed fewer runs than only eight teams.

Finally, we should mention the Pirates' performance in 2015. Only the St Louis Cardinals allowed fewer runs per game than the Pirates in 2015, but the Pirates allowed more hits than fourteen other MLB teams.

MLB DATA PLOT

Runs Allowed v Hits Allowed for MLB teams in 2015

2016 KILLERSPORTS.COM MLB BIBLE TREND SET

This section contains 18 perfect past performance records for each of the thirty MLB teams. Three are straight up positive indicators, three are straight up negative indicators, three are run-line positive indicators, three are run-line negative indicators, three are over indicators and three are under indicators.

With the samples below, we can see how the trends in past performance are presented. Each team's performance indicators are presented in a table that has three columns and 18 rows. The first column is used to identify the trend, so it can be referred to. This is useful when checking the results any of the trends during the season and the team at KillerSports.com might refer to these numbers when presenting the video query of the day. The second column contains the record of the team and a description of the situation. Finally the third column is the SDQL text for the particular situation. The SDQL text can be used to check the current record of any trend in this book. An example of a straight up play-ON trend is given below.

TREND ID	TREND DESCRIPTIONS	SDQL TEXT
LAA001	The Angels are 16-0 SU as a road favorite vs a divisional opponent that has more wins on the season.	<i>team=Angels and AF and DIV and wins<o:wins and date>=20120522</i>

Here we see that the trend ID is LAA001, which indicates that it is the Angels' trend #1. The English text describes the trend. This one reveals that the Angels are, "16-0 SU as a road favorite vs a divisional opponent that has more wins on the season." The SDQL (Sports Data Query Language) gives the text that will return the results of this trend at an SDQL Query Page. So, you can check the current result of this trend and any other trend in the book anytime you want and it is absolutely free. No registration or membership is necessary. There are also a set of six run-line trends for each team. An example of a play-AGAINST run-line trend is given below:

TREND ID	TREND DESCRIPTIONS	SDQL TEXT
HOU011	The Astros are 0-10 RL SU as a favorite when they scored two or fewer runs for their starter in his last start.	<i>team=Astros and F and s:runs<3 and date>=20150815</i>

Finally, the last set of six trends for each team are of the OU variety. The first three are play-OVER and the last three are play-UNDER. An example of a play-UNDER OU trend is:

TREND ID	TREND DESCRIPTIONS	SDQL TEXT
HOU016	The Astros are 0-12 OU as a 135+ dog when opponents starter has an ERA of less than 2.6 on the season.	<i>team=Astros and line>=135 and o:STDSERA<2.6 and date>=20140505</i>

There are certainly a lot of trends in past performance in this section. Some will continue into the 2016 season and others will not. Teams evolve and coaches change and players change teams. To be a complete handicapper, trends in past performance must be *combined* with a knowledge of the game and knowledge of how to evaluate trends.

It is important to know that all 10-0 trends are not created equal. There are three keys to look for when evaluating trends in past performance and it starts with the game listing. First is timeliness -- how recent are the games that make up the trend? How many are from this season? Second is the margin by which the team has been winning or losing. A quick scan of the recent games in the listing will reveal whether the margin have been a half run or a single run or whether they have been multiple runs. Third is the relevance of the trend: does the reason for the trend in performance still exist?

Once the season starts, there will be a listing of all the ACTIVE trends at killersports.com. The link is:

<http://killersports.com/mlb/trends>

To see all the active trends from the 2016 MLB Handicapping Bible, just click on "All Bible." To see ALL the trends -- both active and inactive -- set the active date menu to "any." Of course, the active Bible trends listing is ABSOLUTELY FREE!! Enjoy.

LOS ANGELES ANGELS

TREND ID	TREND DESCRIPTIONS	SQL TEXT
LAA001	The Angels are 16-0 SU as a road favorite vs a divisional opponent that has more wins on the season.	<i>team=Angels and AF and DIV and wins<o:wins and date>=20120522</i>
LAA002	The Angels are 14-0 SU as a favorite after a win in which they left fewer than 10 men on base and it is not the first game of a series.	<i>team=Angels and F and p:LOB<10 and p:W and SG>1 and date>=20130925</i>
LAA003	The Angels are 12-0 SU as a favorite in a home series opener when they hit at least one home run in their last game.	<i>team=Angels and HF and p:HR>0 and SG=1 and date>=20150424</i>
LAA004	The Angels are 0-13 SU in the last game of a road series when opponent's starter has a strike-per-ball ratio greater than 2 on the season.	<i>team=Angels and A and o:STDSSPB>2 and LGS and season >= 2010</i>
LAA005	The Angels are 0-12 SU as a dog in the last game of a series after a loss in which they used five-plus pitchers.	<i>team=Angels and D and 5<=p:PU and p:L and SG=SGS and season >= 2012</i>
LAA006	The Angels are 0-9 SU in the last game of a series when they are off two one-run wins.	<i>team=Angels and p:margin=1 and pp:margin=1 and LGS and season >= 2008</i>
LAA007	The Angels are 12-0 RL when their line is within 20 cents of pickem when seeking immediate revenge for a road loss in which they drew 1 or fewer walks.	<i>team=Angels and -120 <= line <= 120 and p:walks<=1 and p:AL and SG>1 and date>=20130428</i>
LAA008	The Angels are 11-0 RL in the first game of a road series when their line is within 20 cents of pickem and they are off a one-run win.	<i>team=Angels and A and -120<=line<=120 and p:margin=1 and SG=1 and date>=20110530</i>
LAA009	The Angels are 10-0 RL as a road favorite when their starter went less than four innings in his last start and it is not the first game of a series.	<i>team = Angels and AF and s:SIP <4 and SG > 1 and season >= 2007</i>
LAA010	The Angels are 0-21 RL as a favorite after a home win in which they did not walk the opponent.	<i>team=Angels and F and po:walks=0 and p:HW and season >= 2010</i>
LAA011	The Angels are 0-16 RL as a 130+ favorite after a home win in which they had at least three times as many hits as runs and it is not the first game of a series.	<i>team=Angels and line<=-130 and p:HPR>=3 and p:HW and SG>1 and date>=20070800</i>
LAA012	The Angels are 0-12 RL at home after a loss in which they had at least five more team-left-on-base than their opponent.	<i>team = Angels and H and p:L and p:TLOB - po:TLOB >= 5 and date >= 20120800</i>
LAA013	The Angels are 14-0 OU on the road after a 5+ run win at home.	<i>team=Angels and A and p:margin>=5 and p:H and date>=20080700</i>
LAA014	The Angels are 13-0 OU as a favorite when they won the last two games their starter started.	<i>team=Angels and F and s:W and ss:W and date>=20150530</i>
LAA015	The Angels are 12-0 OU on the road after a home win in which they never trailed.	<i>team=Angels and A and po:BL=0 and p:HW and date>=20110809</i>
LAA016	The Angels are 0-12 OU as a 140+ road favorite when they won by one run in their starter's last start and it is not the first game of a series.	<i>team=Angels and A and line<=-140 and s:margin=1 and SG>1 and season >= 2005</i>
LAA017	The Angels are 0-10 OU as a favorite after a home game in which they scored more runs off the bullpen than they did off the starter and it is not the first game of a series.	<i>team=Angels and F and po:BPRA>po:SRA and p:H and SG>1 and date>=20140506</i>
LAA018	The Angels are 0-10 OU as a 140+ favorite in the last game of a home series when they scored two or fewer runs for their starter in his last start.	<i>team=Angels and H and line<=-140 and s:runs<3 and LGS and date>=20120830</i>

TREND ID	TREND DESCRIPTIONS	SDQL TEXT
HOU001	The Astros are 14-0 SU when their line is within 25 cents of pickem in a series opener when they won by one run in their starters last start.	<i>team=Astros and -125<line<125 and s:margin=1 and SG=1 and date>=20090427</i>
HOU002	The Astros are 11-0 SU in the last game of a home series after scoring 6+ runs.	<i>team=Astros and H and 6<=p:runs and LGS and date>=20140903</i>
HOU003	The Astros are 9-0 SU after a win in which they drew 5+ walks.	<i>team=Astros and 5<=p:walks and p:W and date>=20150615</i>
HOU004	The Astros are 0-14 SU as a dog after a home game in which their opponent scored first, they took the lead, but lost.	<i>team=Astros and D and p:HL and po:SF and p:BL>0 and date>=20120819</i>
HOU005	The Astros are 0-14 SU as a dog after a win in which they allowed 12+ hits.	<i>team=Astros and D and 12<=po:hits and p:W and date>=20100607</i>
HOU006	The Astros are 0-11 SU as a road dog after allowing 6+ runs at home.	<i>team=Astros and AD and po:runs>=6 and p:H and date>=20120629</i>
HOU007	The Astros are 17-0 RL as a dog in the first game of a road series after a road game in which they hit more home runs than their opponent.	<i>team=Astros and AD and p:A and SG=1 and p:HR>po:HR and date>=20120907</i>
HOU008	The Astros are 13-0 RL as a road dog after a road game in which they scored in at least five separate innings.	<i>team=Astros and AD and p:SII>=5 and p:A and date>=20121001</i>
HOU009	The Astros are 12-0 RL as a dog in the last game of a series after a win in which they allowed 6 or fewer hits.	<i>team=Astros and D and po:hits<=6 and p:W and LGS and date>=20140528</i>
HOU010	The Astros are 0-11 RL as a favorite after a win in which they were tied at the end of 6 innings and it is not the first game of a series.	<i>team=Astros and F and p:M6=0 and p:W and SG>1 and date>=20070516</i>
HOU011	The Astros are 0-10 RL SU as a favorite when they scored two or fewer runs for their starter in his last start.	<i>team=Astros and F and s:runs<3 and date>=20150815</i>
HOU012	The Astros are 0-9 RL as a road favorite after a game in which they struck out their opponent at least ten times.	<i>team = Astros and AF and po:SO >= 10 and date >= 20150619</i>

MLB MASTERS EXAMS

The keepers of the Sports Data Query Language (SDQL) offer periodic Masters Exams for those researchers who would like to be officially certified as an SDQL Master. There is a listing of SDQL masters at SDQL.com.

Here are the five MLB SDQL Masters Exams

The answers to each question are available as short videos on YouTube. To find the playlist, do a Google search for “MLB SDQL Masters Exam 1-1.”

Masters Exam 1

1. Which MLB starter has produced a team record of 32-0 since June 2013 when his team was leading after five innings have been played?
2. In the history of the database at SportsDataBase.com, there has only been one starter that issues eight more walks than strikeouts in a game that his team won. Name the starter.
3. In the history of the MLB database, how many teams had five hits all of which were home runs?
4. In the history of the database at SportsDataBase.com, there has only been one starter that produced a quality start in which he walked five and allowed three home runs. Name the starter.
5. In the history of the database at SportsDataBase.com, there has only been one game in which a team won by six runs after trailing by nine runs. Name this team that pulled off the 15-run turnaround.
6. What is the largest number of runners left on base by individual players for a single game by a team that was shutout?
7. In the history of the database, what is the longest homestand in which a team went 0-fer (did not win any games?)
8. In the history of the database, what is the winning percentage of home favorites when they allow exactly one run in the top of the first inning?
9. In the history of the database, has a game ever gone over the total that went into extra innings tied at zero? If so, name this game.
10. In the history of the database at SportsDataBase.com, what is the largest number of runs a team has scored in the bottom of the ninth inning to win?

MLB MASTERS EXAMS

The answers to each question are available as short videos on YouTube. To find the playlist, do a Google search for “MLB SDQL Masters Exam 1-2.”

Masters Exam 2

1. Since 2006, what is the combined record of the teams from New York City when they are a 170-plus underdog when seeking immediate revenge for a loss in which they left fewer than ten men on base?

2. In the history of the MLB database at SportsDataBase.com, which is the only team that has never lost as a favorite of more than 110 in the last game of a three-game home series in which they lost the first two?

3. In the history of the MLB database at SportsDataBase.com, which is the only team that has never lost as a dog in a series opener when they are off an extra inning loss yesterday?

4. Since the start of the 2011 season, which team is 0-15 as a dog after an extra inning win?

5. Which MLB team is the only one that is winless in the history of the database when playing the last game of a series off a shutout win?

For questions 6-10, match the straight up winning percentages to the situation or statistical result for the game, thus ranking the importance of each.

6-10

a) 52.9%

b) 54.1%

c) 59.4%

d) 66.4%

e) 84.1%

6. The home team

7. The team whose starter has a lower STD WHIP

8. The team that scored first

9. The team whose bullpen allowed fewer runs

10. The team that struck out fewer times

MLB MASTERS EXAMS

The answers to each question are available as short videos on YouTube. To find the playlist, do a Google search for “MLB SDQL Masters Exam 1-3.”

Masters Exam 3

1. Which team is the only one in the database to score double-digit runs in five straight games?

2. Which team suffered the embarrassment of playing a game in which they had five more errors than hits?

3. In the history of the database at SportsDataBase.com, what is the largest number of home runs a team hit and still lost the game?

4. In the history of the database at SportsDataBase.com, what is the largest first inning deficit that a team has ever come back from to win?

5. In the history of the database at SportsDataBase.com, what is the largest number of runs a team scored in the first inning in a game that stayed under the total?

For questions 6-10, match the straight up winning percentages to the situation or statistical result for the game, thus ranking the importance of each.

6-10

a) 53.0%

b) 57.7%

c) 62.8%

d) 72.3%

e) 90.8%

6. The team that is the favorite.

7. The team whose starter has a lower STD ERA.

8. The team that had the highest scoring inning.

9. The team that committed fewer errors

10. The team whose starter pitched more innings.

MLB MASTERS EXAMS

The answers to each question are available as short videos on YouTube. To find the playlist, do a Google search for “MLB SDQL Masters Exam 1-4.”

Masters Exam 4

1. In 2014, which team produced the most profitable month?

2. In 2014, which team produced the month with the greatest net loss?

3. In the history of the database, what is the greatest number of consecutive one-run losses suffered by a team?

4. In the history of the database, what is the greatest number of consecutive extra inning games a team has played?

5. Which team had the most multiple-run wins in 2014?

For questions 6-10, match the straight up winning percentages to the situation or statistical result for the game, thus ranking the importance of each.

6-10

a) 52.5%

b) 58.4%

c) 65.0%

d) 68.4%

e) 79.4%

6. The team whose starter faced more batters.

7. The team that had more hits.

8. The team that drew more walks.

9. The team whose starter has a higher season-to-date strike per ball ratio.

10. The team that led after the first inning

MLB MASTERS EXAMS

The answers to each question are available as short videos on YouTube. To find the playlist, do a Google search for "MLB SDQL Masters Exam 1-5."

Masters Exam 5

1. In 2014, which MLB team had only two walk-off wins all season -- fewest in the league?

2. Which MLB pitching staff combined for the most complete games in 2014?

3. Which MLB team had the most wins in which they never trailed in 2014?

4. Which MLB team had the most come-from-behind wins in 2014?

5. Which pitching staff had the most quality starts in 2014?

For questions 6-10, match the straight up winning percentages to the situation or statistical result for the game, thus ranking the importance of each.

6-10

a) 48.6%

b) 54.1%

c) 60.3%

d) 74.6%

e) 90.8%

6. The team that hit more home runs

7. The team that has a better W-L record

8. The team whose bullpen struck out more batters.

9. The team that scored in more innings.

10. The team whose starter threw more pitches.
