MTI's Newsletter Teaser Plays...

Two-Team, Six-Point Teaser Play of the Week

> **4.5-Star Denver +6, Minnesota pick**

Supporting Teaser-Specific Trends: The Vikings are 17-0 ATSp6 as a home favorite off a loss in which they never led. The Broncos are 17-0 ATSp6 off a road win when the line is within 3 of pick and when facing a team that has a season-to-date average third down conversion percentage of less than 40%.

Three-Team, Ten-Point Teaser Play of the Week

> **4-Star NY Jets +13.5, Baltimore +8.5, Green Bay +3**

Supporting Teaser-Specific Trends: The Jets are 27-0 ATSp10 on the road off a win in which their opponent scored first. The Ravens are 25-0 ATSp10 as a home favorite off a road game vs a team that had more regular season wins the previous season. The Packers are 16-0 ATSp10 off a loss as a dog vs a non-divisional opponent that has a season-to-date average third down conversion percentage of less than 40%.

In This Issue:

Tracking The 2016 Season...

While the powerful SDQL is great for tracking complex and very specific handicapping information, it is also just as useful for tracking the basics. In this spot all season long we will track basic handicapping situations over the full season, as well as how they did in 2015.

Situation	2016 ATS record	2015 ATS record
Home	58-56-3	117-132-7
Home Dog	20-15-1	40-39-3
Home Favorite	36-37-2	74-85-4
Off a win	52-50-2	122-108-10
Off a Cover	53-47-2	119-106-8
Passes Per Game	36.1 passes	35.8 passes
Rushes Per Game	25.7 rushes	26.3 rushes
Average Total Score	45.9 ppg.	45.6 ppg.

MTi's Side Play

4.5-Star NY Jets +3.5 over MIAMI -- The Dolphins came back from a third quarter deficit to nip their hated rival, the Buffalo Bills by a 28-25 margin. The league as a whole is 1-17 ATS since the start of the database as a favorite when they are off a win as a home dog over a divisional opponent in which they were trailing after the third quarter. The lone cover was a 31-28 overtime win as a 2-point favorite in overtime.

The Dolphins themselves are 0-11 ATS at home off a wins as a dog in which they were trailing at the half, 0-11 ATS as a favorite and vs a divisional opponent after a 1 to 3 point win and 0-8 ATS after they had at least 100 penalty yards.

NYJ002, from the 2016 NFL Handicapping Bible reveals that: The Jets are 12-0 ATS off a win as a favorite when facing a team that has scored on less than 31% of their drives, season-to-date.

New York is also 9-0 ATS off a win as a favorite and when they are playing a team with a better record. The SDQL text is:

team = Jets and p:WF and WP<o:WP and date >= 20081102

Note that the Jets have been covering by an average of double digits and in their last game in this spot (week 16 last season), they beat the Patriots 26-20.

New York will be a heavy favorite to finish in last place in the divisional if they lose here. We expect this will be sufficient motivation to keep this one close. Grab the three-and-a-hook.

MTi's FORECAST: NY Jets 20 MIAMI 17

MTi's Newsletter Totals Play

4-Star Ravens at Steelers UNDER 43.5 - We'll start this one off with a league-wide system that has not lost in 25-plus seasons. Teams with 10-plus days rest are 0-18 OU when they are at home vs a divisional opponent when the line is between pick and a three-point favorite and they were a dog on Sunday the last time they faced their opponent. The SDQL text is:

rest>=10 and -3<=line<0 and H and DIV and P:D and P:day=Sunday and date>19901015

Note that there were two overtime games that both went into extra time tied at 13 and over the 18 games these teams have held their opponent to an average of 11.7 ppg. This system makes good handicapping sense. A team with extra rest as a short home favorite vs a divisional rival should play it close-to-the-vest.

Fitting into this league-wide system is the fact that the Ravens are 0-7 OU at home after their bye week.

Also, Baltimore is 0-12 OU as a favorite and on grass and after a game in which one player had at least 75% of their rushing yards and 0-14 OU as a favorite on grass after a game in which they had at least three times as many rushing yards as passing yards and a completion percentage of better than 55%. The SDQL text is:

team = Ravens and F and surface = grass and p:PY/p:RY > 3 and p:CP>55 and date >= 19961100

Last week against the Patriots, the Steelers were forced to throw the ball in an attempt to keep up on the scoreboard. Here, they can adopt a more conservative strategy, as the Ravens offense has struggled. As evidence, Pittsburgh is 0-13 OU since the start of the 2011 season on grass vs a divisional opponent that has a third-down conversion rate of less than 40% and a completion percentage of better than 55%. The SDQL text is:

team = Steelers and surface = grass and DIV and oA(3DP)<40 and oA(CP)>55 and season >= 2011

This one already cashed once this season. The play is the UNDER.

MTi's FORECAST: Pittsburgh 13 BALTIMORE 10

SBB's Newsletter Side

4.5-STAR Philadelphia over NY GIANTS – Of these two teams, Philadelphia is simply better than the Giants. Last week, they saw what it would take to beat a good divisional opponent and outplayed their top divisional foe in Dallas though they did not come out with the victory. Taking a step down in competition here we don't see them coming out of the road trip empty handed.

Philadelphia is at the tail end of this challenging road NFC East back-to-back. Teams playing their second straight road games are 538-441-21 ATS (A and p:A and season>=2003).

Last week they lost in Dallas, 29-23 in overtime. Usually their strong point is their defense, but it was their downfall in the loss as they allowed 460 total yards. The Eagles are 9-0 ats since Dec 09, 2012 after a road loss where they allowed at least 400 yards offense (team=Eagles and po:passing yards + po:rushing yards>=400 and p:AL and date>=20121209).

Philadelphia meanwhile only had 291 yards of offense in the game. The Eagles are 7-0 ats since Oct 06, 2013 off a road loss where they were outgained by their opponent (team = Eagles and p:AL and p:TY< po:TY and date >= 20131006).

They allowed 26 total first downs in the game with a solid ground game. The Eagles are 8-0 ats since Dec 04, 2006 after a road game where they allowed at least 26 first downs (team=Eagles and po:first downs>=26 and p:A and date>=20061204).

New York actually comes into this game off of two positive results before their bye, winning and covering in both. The Giants are 0-6 ats since Dec 07, 2008 vs a divisional opponent when they are off two consecutive wins and ATS wins (team=Giants and DIV and streak>=2 and ats streak>=2 and date>=20081207).

However, their winning game plans in those games will be hard to replicate. They were unable to successfully pick up yardage on the ground in either of those wins Baltimore and Los Angeles. Teams which ran for no more than 50 yards for two straight games are 47-71-4 ATS (pp:RY<=50 and p:RY<=50).

SPORTSBOOK BREAKERS PREDICTION: Philadelphia by 10

SportsBook Breakers' Total Play

4-STAR NY Jets and Miami Under – Miami has found great success with their run game the past two games going into their bye and with the extra week of rest we expect them to go back to the well here with Jay Ajayi in the big way. That is not a super efficient way to attack New York and their strong defense but we expect the Dolphins to try it none the less and for that to help drive an under.

New York won an expectably high scoring game last week in Cleveland, 31-28. Teams which won a game in which they allowed at least 28 points last game are 211-270-10 OU (po:points>=28 and p:W).

New York got outplayed for significant stretches of that game but the key was that they allowed no turnovers. The Jets are 0-7 ou since Nov 09, 2014 after they had zero turnovers (team=Jets and p:turnovers=0 and date>=20141109).

Miami also did not commit a turnover in their last game before their bye, winning over Buffalo 28-25. The Dolphins are 0-9 ou since Sep 20, 1998 at home as a favorite off a win after they had zero turnovers (team = Dolphins and p:W and HF and p:turnovers = 0 and date >= 19980920).

Ajayi had his second straight monster game in that win, rushing for at least 214 yards. Teams which had at least an 152 yard rusher last game are 139-178-3 OU (max:p:rushing yards>=152).

In both of Ajayi's huge games Miami scored more points than expected. The Dolphins are 0-8 ou since Dec 15, 2013 and when they are off two consecutive games with a positive DPS (team=Dolphins and 0<tp:dps and 0<pp:dps and date>=20131215).

SPORTSBOOK BREAKERS PREDICTION: 36 points

SportsBook Breakers' NFL Player Trends

| Trends	Sports Data Query Language
The Packers are 9-0 ats since Dec 05, 2010 coming off a loss where Aaron Rodgers threw at least 35 passes for 235-365 yards.	*Aaron Rodgers:p:passes>=35 and p:L and 365>=Aaron Rodgers:p:passing yards>=235 and date>=20101205*
The Saints are 0-9 ats since Sep 14, 2014 as a favorite of more than three points after Drew Brees threw for at least 250 yards last game.	*Drew Brees:p:passing yards>=250 and line<-3 and date>=20140914*
The Steelers are 0-10 ou since Dec 14, 2014 after LeVeon Bell had at least 15 rushes last game.	*LeVeon Bell:p:rushes>=15 and date>=20141214*
The Chargers are 0-7 ou since Nov 25, 2012 after a road game where Philip Rivers threw at least two interceptions.	*Philip Rivers:p:interceptions thrown>=2 and p:A and date>=20121125*
The Packers are 0-7 ou since Nov 30, 2014 after a road game where Aaron Rodgers threw for at least two touchdowns.	*Aaron Rodgers:p:passing touchdowns>=2 and p:A and date>=20141130*

SportsBook Breakers' Spotlight System

SportsBook Breakers has spent the past season focused on league systems and has found over 100 that are winners at well over the 55% required rate for the long-term success. Each week, SBB will highlight an active league system here. If you are looking for more SDQL-based systems from SBB each week, check out their offerings on the Killersports.com Trends Mart.

PLAY AGAINST: Teams which committed over 100 penalty yards for two straight games

15-29-2 ATS (-1.63, 34.1%)

SDQL TEXT: p:PENY>100 and pp:PENY>100

In the NFL, penalties are a big deal. Teams are relatively evenly matched so that really magnifies giving away free yards. And going forward, penalties are not simply a random game-to-game issue. They can be a sign of bad coaching or just an undisciplined young team.

Teams which committed over 100 penalty yards for two straight games are 15-29-2 ATS.

Committing over 100 penalty yards in a game is a significant amount and a fairly rare occurrence. Teams commit more than 100 penalty yards in only 4.77% of games. And those penalties have an affect, dropping a team's win expectancy down to 41.7%. To show that this is not completely random in its occurrence, teams that commit more than 100 penalty yards in one game do so at a significantly higher rate than the average of 7.32% in their next games.

A team that has historically been known for committing an inordinate amount of penalties is the Oakland Raiders. This season is no different as Oakland has committed at least 117 penalty yards in three games this season. After committing 117 penalty yards in week seven, the Raiders really were penalized heavily last week with 200 yards.

Now Oakland is particularly interesting as the penalties have not cost them yet as they have won each of the last two weeks. Teams that have won two straight weeks with more than 100 penalty yards in each are just 2-8 ATS in the next game. This week, Oakland hosts a big Sunday night match-up with Denver. Consider going against them here.

Cajun Sports College Football System

From Game 6 on, play AGAINST a road underdog of less than 25 points off a home SU loss in 2+ overtimes, scoring less than 49 points.

SDQL Text

p:LH and p:overtime>1 and 25>line>0 and A and game number>5 and date>19961123 and p:points<49

System Analysis

The weeks continue to fly by as the college football season nears the finish line. With the playoff selection committee releasing their first set of playoff projections this week the stress and strain of the regular season reaches a whole new level for the first six to eight teams in the polls. In the first two seasons of the College Football Playoff, only one team each season made the committee's initial top four and the final four. The stress of performing is real and these kids on the teams in contention feel the pressure.

For us it wasn't pressure it was the fact our play ON team let us down last week as Purdue lost to Penn State in West Lafayette 62 to 24 failing to cover the spread and costing us a System of the Week winner in the process. Our current NCAA Football System of the Week record now stands at 5-2-1 ATS on the season.

This week our research focused on overtime games we have seen back-to-back weeks in the NFL with overtime ties and college teams playing multiple overtimes to decide the winners. We were curious as to the effect an extra stanza would have on our young college football players. Would they suffer a letdown both physically and mentally if they lost in overtime and what if they had to play multiple overtimes to decide the winner and came up short in that situation.

Our research uncovered a situation whereas these teams that played multiple overtime periods and lost really struggle if they have to play away from home in their next game. After a home straight up loss that went to multiple overtimes, road underdogs have had very little life especially when playing in the second half of the season.

Other than the baseline parameters we mentioned we want our road underdog to have scored fewer than forty-nine points in their double-overtime loss. This parameter keeps games that were offensive explosions out of the equation and qualifies teams that played more of a balanced game with offense and defense both playing a role in the eventual outcome.

Last week the TCU Horned Frogs were home and installed as nine-point favorites against Big 12 rival Texas Tech Red Raiders. This contest and the outcome fit perfectly into our play against system this week as they needed double-overtime to decide the winner and the Red Raiders pulled off the upset victory 27 to 24 on Saturday in Fort Worth.

With the system parameters met this week's Cajun Sports NCAA Football System of the Week qualifies a play AGAINST the TCU Horned Frogs in their game versus the Baylor Bears. The oddsmakers have opened the TCU Horned Frogs as nine-point underdogs on the road in Waco on Saturday. This qualifies the Baylor Bears as the systems play ON team this week.

Have a great weekend and as always good luck.

SBB's Five NFL Trends to Watch: Week 9

Trends	Sports Data Query Language
The Vikings are 13-0 ats since Oct 19, 2014 after they had more punts than third downs made last game.	*team = Vikings and p:3DM < p:punts and date >= 20141019*
The Titans are 0-13-1 ats since Dec 20, 2009 and after they scored 10+ points more than their season-to-date average.	*team = Titans and tA(tp:points) + 10 <= p:points and date >= 20091220*
The Browns are 0-10 ats since Oct 10, 2010 as a dog facing an opponent that is averaging at least 30 rushes per game.	*team = Browns and D and 30 <= oA(rushes) and date >= 20101010*
The Eagles are 14-0 ou since Oct 06, 2013 off a loss where they made at least 5 third downs.	*team = Eagles and p:L and p:3DM >= 5 and date >= 20131006*
The Chiefs are 0-10-2 ou since Dec 17, 2005 after they had more than 300 passing yards last game.	*team = Chiefs and 300 <= p:PY and date >= 20051217*

SBB's College Football Trends to Watch (11-5)

Trends	Sports Data Query Language
Louisville is 12-0 ats since Sep 19, 2009 on the road after failing to cover by at least seven points last game.	*team=LOU and A and p:ats margin<=-7 and date>=20090919*
Wyoming is 10-0 ats since Nov 08, 2008 after a home game where they allowed at least seven points less than expected.	*team=WYO and p:dpa<=-7 and p:H and date>=20081108*
Virginia Tech is 0-10 ats since Oct 01, 2011 coming off a road win where they scored at least 28 points.	*team=VTCH and p:points>=28 and p:AW and date>=20111001*
Louisiana-Lafayette is 16-0-1 ou since Sep 20, 2008 as a home favorite after scoring less than expected.	*team=LLAF and HF and p:dps<0 and date>=20080920*
Wake Forest is 0-12 ou since Nov 07, 2009 after committing at least three turnovers in a loss.	*team=WAKE and p:turnovers>=3 and p:L and date>=20091107*

SPORTSBOOK BREAKERS NFL AND NCAA
SELECTIONS ARE NOW AVAILABLE UNDER
AT KILLERCAPPERS.COM

We're nearing the midway mark of this NFL season and just as 'team averages' for certain statistics start to take a firmer hold, so to do the misconceptions of what these teams are truly capable of.

One stat that often plays a huge role in determining the outcome of a game is 'turnover margin'. In fact, just this year the record for teams that won the turnover battle is 69-26-1 SU and 71-24-1 ATS (74.7%). You can get a full list of those games with the following code and remember, turnovers are an offensive stat, so less (negative) is better.

SDQL: TOM < 0 and season = 2016

Now there is an old saying among bettors that, "You can't handicap turnovers". If nothing more it's an easy explanation for why a game didn't turnout the way one had hoped, and while it may be true to some extent (especially with fumbles), the result of any high-turnover game is certainly factored into that team's future ATS and Over/Under lines.

In some cases, the previous outcome of a game creates an inflated pointspread or total and if the results hinged heavily on the winner's turnover margin, there is potential for an overlay. Here is an example that's "live" in Week 9 with the Jacksonville Jaguars at Kansas City Chiefs (-9.5 and O/U 46).

SDQL: p:TOM < -1 and H and tS(TOM) < 0 and team = Chiefs and date >= 20081116

Kansas City forced three fumbles (recovered one) in last week's 30-14 win over the Colts. They also recorded six sacks and one interception to finish with a plus-2 turnover margin. The past 13 home games for the Chiefs that followed such a performance have led to a 2-11 ATS record with 3 overs, 8 unders and a couple pushes. KC won eight of the games straight-up but only one was by more than eight points. All three overs were on totals of 42 or less.

Checking a team's overall turnover margin for the current and previous season can also be an effective step in determining line value. The Chiefs led the AFC in turnover margin last season at +14 (SDQL: tS(TOM @ REG) @ team and season = 2015). In 2013, Andy Reid's first with the club, they were -3 in overall turnover margin. According to this query, the real value on this matchup rests with the total.

SDQL: CHF and tpS(TOM @ REG) < -10 and tppS(TOM @ REG) > 0 and 45 < total < 52

The Chiefs had a top five defense in the NFL last year and although they dealt with injuries through the early part of 2016, they are starting to regain playoff caliber form. Injuries on offense are another story but Reid is more than capable of writing a gameplan that hinges on his defense's ability to execute. They are +9 in turnover margin this year but the bulk of that came from one win against the Jets. This line is inflated against a horrible Jaguars offense but with a total in this range we've seen 32 of the past 45 games stay below the total (12-32-1 O/U).

SDQL: CA and p:AL and NB and p:day = Thursday and total > 43

Conference road teams off a Thursday road loss are 3-11 SU and 4-10 ATS (above SDQL) when the total is more than 43 and all three winners were favored. Three of four covers were divisional games but this is just another game for the Jags, with Houston (divisional) on-deck. The Over/Under record for this angle is 4-10 O/U and as KC hunkers down to try and secure another home win, I'm playing this one to stay below the number.

Pick No. 1: Jaguars and Chiefs UNDER 46 points

ROAD DOGS CATCHING ACTION

There are three road dogs fetching early money this week according to early line movement, as the Eagles (+3), Jets (+4.5) and Bills (+7) have each fallen by at least a half-point in value. Philadelphia is playing their second-straight divisional road game and since 2004, dogs are 23-15 ATS in this situation with 25 overs and 13 unders (65.8%). Use this code for a complete list:

SDQL: AD and p:AL and DIV and p:DIV and NB and season > 2003

The Jets are "live" in this angle that is 63-percent effective on under bets since 2004 with an average total that's almost identical to their posted total in Miami (O/U 44). We're looking for divisional road dogs off a road fave win (no bye in-between). The record is 11-19-1 O/U.

SDQL: AD and DIV and p:AFW and NB and season > 2004

Finally, consider this angle when handicapping the Bills at Seahawks game on Monday. It's looking at home faves of -6 points or more that are struggling to run the football and the past five years, it has a record of 12-4-1 O/U.

SDQL: HF and line <= -6 and tA(RY) < 85 and season > 2011 and total < 44

#On Monday Night, *On Sunday Night, % On Saturday Night, ^On Thursday Night

Notes:

Falcons at Buccaneers - The Falcons are 0-11 ats since Oct 11, 2015 as a favorite. The Falcons are 7-0 ats since Dec 21, 2008 on the road when the line is within 3 of pick and after a 1 to 3 point win. The Buccaneers are 0-9 ats since Dec 07, 2014 as a dog after a game in which no receiver had at least 40% of their passing yards. The Falcons are 6-0 ou since Sep 18, 2016 after fewer than 30 percent of their first downs were from third down. The Falcons are 0-6 ou since Nov 29, 2012 and when they are playing a team they lost to earlier in the season. The Buccaneers are 0-9 ou since Nov 09, 2014 and facing an opponent that is averaging at least 375 offensive yards per game .

Cowboys at Browns - The Cowboys are 0-9 ats since Dec 25, 2010 as a favorite and after a win with a positve DPA. The Cowboys are 7-0 ats since Sep 15, 2013 off a win on the road after they had more than 34 minutes of possession time. The Browns are 0-7 ats since Oct 10, 2010 at home as a dog off a home game. The Cowboys are 0-7 ou since Oct 04, 2015 vs a non-divisional opponent after they made 4 or fewer third downs last game. The Cowboys are 6-0 ou since Nov 09, 2014 and as a favorite and when they allowed at least 5 third downs in each of their last two games. The Browns are 9-0 ou since Oct 07, 2012 off a loss where they had more than 300 passing yards. The Browns are 0-7 ou since Dec 10, 2009 at home as a 7+ dog.

Titans at Chargers - The Titans are 0-9 ats since Oct 31, 2010 after they scored more than 33 points. The Titans are 8-0 ats since Oct 26, 1997 on the road as a dog after they had fewer than 10 incompletions in a 10+ win. The Chargers are 0-8 ats since Oct 19, 2009 as a favorite and after they had at least one defensive TD. The Chargers are 0-7 ats since Oct 12, 2014 as a favorite after they outgained their opponent. The Titans are 0-6 ou since Dec 22, 2013 when they are on the road between two home games. The Chargers are 0-7 ou since Nov 02, 2014 when they are off two consecutive games with a positive DPA.

Jaguars at Chiefs - The Jaguars are 0-7 ats since Oct 18, 2015 on grass after a game in which they did not have a 50-plus yard rusher. The Jaguars are 6-0 ats since Dec 14, 1997 on the road and when they had a positive turnover margin in each of their last three games. The Chiefs are 8-0 ats since Sep 19, 2013 vs a non-divisional opponent when they are off two consecutive

wins with out an interception. The Jaguars are 7-0 ou since Dec 31, 2006 on the road vs a non-divisional opponent after they had less than 26 minutes of possession time. The Jaguars are 0-11 ou since Dec 05, 2010 off a loss in a road game after a game in which no receiver had at least 40% of their passing yards. The Jaguars are 0-6 ou since Oct 17, 2004 off a road game on grass after two losses in which they never led. The Chiefs are 0-9-1 ou since Jan 02, 2005 as a favorite and after passing for three times as many yards as they rushed for. The Chiefs are 0-7 ou since Jan 01, 2006 off a 10+ point win as a 7+ favorite.

Jets at Dolphins - The Jets are 8-0 ats since Nov 10, 1996 as a dog vs a divisional opponent and after a win with a positve DPA. The Dolphins are 11-0-1 ats since Nov 01, 2009 off a game as a dog when they are off two consecutive games with a positive DPS. The Power of Two-Team Teasers

One of the fantastic and unique features of www.killersports.com is the ability to run teaser trends. Each week we'll show off five such two-team teaser trends in this space utilizing this important and often overlooked area of handicapping. Any trend with a "p6" designation is for a play on/under 6-pt teaser and a trend including "m6" is for a play against/over 6-pt teaser.

Teaser Trends	Sports Data Query Language
The Vikings are 24-0 atsp6 since Nov 04, 1990 and when they are off two consecutive 7+ losses	*team=Vikings and p:margin<=-7 and pp:margin<=-7 and date>=19901104*
